Lectures on Morse Homology Augustin Banyaga, David Hurtubise, 2013-03-09 This book offers a detailed presentation of results needed to prove the Morse Homology Theorem using classical techniques from algebraic topology and homotopy theory. The text presents results that were formerly scattered in the mathematical literature in a single reference with complete and detailed proofs. The core material includes CW complexes, Morse theory, hyperbolic dynamical systems, the Lambda Lemma, the Stable Unstable Manifold Theorem, transversality theory, the Morse-Smale-Witten boundary operator, and Conley index theory.
