Europäische Revue Anthony Giddens,Lukas Meyer,Stefan Troebst,2008-11-11 Der Klimawandel stellt die bestehenden demokratischen Institutionen und das Instrumentarium herkömmlicher Politik vor nie gekannte Herausforderungen Zum einen in räumlicher und zeitlicher Hinsicht der Klimawandel ist ein globales ebenso akutes wie langfristiges Phänomen dem nur mit Maßnahmen beizukommen ist die die nationalen Grenzen und den nur bis zu den nächsten Wahlen reichenden Horizont von Parteipolitik überschreiten zugleich wirft er die Frage nach globaler Gerechtigkeit und Generationengerechtigkeit auf Zum andern in struktureller Hinsicht der Klimawandel macht Denken in politischen Ressorts obsolet denn er hat nicht nur ökologische sondern untrennbar davon auch ökonomische soziale und sicherheitspolitische Konsequenzen

The Moral Wager Malcolm Murray,2007-05-05 In the following chapters I offer an evolutionary account of morality and from that extrapolate a version of contractarianism I call consent theory Game theory helps to highlight the evolution of morality as a resolution of interpersonal conflicts under strategic negotiation It is this emphasis on strategic negotiation that underwrites the idea of consent Consent theory differs from other contractarian models by abandoning reliance on rational self interest in favour of evolutionary adaptation From this more emphasis will be placed on consent as natural convergence rather than consent as an idealization My picture of contractarianism then ends up looking more like the relativist model offered by Harman rather than the rational or pseudo rational model offered by Gauthier let alone the Kantian brands of Rawls or Scanlon So at least some of my discussion will dwell on why it is no loss to abandon hope for the universal categorical morality that rational models promise In the introduction I offer the betting analogy that underwrites the remaining picture There are some bets where the expected utility is positive though the odds of winning on this particular occasion are exceedingly low In such cases we cannot hope to give an argument that taking the bet is rational The only thing we can say is that those predisposed to take this kind of bet on these kinds of occasions will do better than those with other dispositions so long as such games

occur often enough The Assault on International Law Jens David Ohlin, 2014-12-22 International law presents a conceptual riddle Why comply with it when there is no world government to enforce it The United States has a long history of skepticism towards international law but 9 11 ushered in a particularly virulent phase of American exceptionalism as the US drifted away from international institutions and conventions Although American politicians and their legal advisors are often the public face of this attack the root of this movement is a coordinated and deliberate attack by law professors hostile to its philosophical foundations including Eric Posner Jack Goldsmith Adrian Vermeule and John Yoo In a series of influential writings they have claimed that since states are motivated primarily by self interest compliance with international law is nothing more than high minded talk These abstract arguments provide a foundation for dangerous legal conclusions that international law is largely irrelevant to determining how and when terrorists can be captured or killed that the US President alone should be directing the War on Terror without significant input from Congress or the judiciary that US courts should not hear lawsuits alleging violations of international law and that the US should block any international criminal court with jurisdiction over Americans These polemical accounts have ultimately triggered America's pernicious withdrawal from international cooperation In The Assault on International Law Jens David Ohlin exposes the mistaken assumptions of these New Realists in particular their impoverished utilization of rational choice theory In contrast he provides an alternate vision of international law based on an innovative theory of human rationality According to Ohlin rationality requires that agents follow through on their plans and commitments even when faced with opportunities for defection as long as the original plan was beneficial for the agent Seen in the light of this planning theory of rational agency international law is the product of nation states cooperating to escape a brutish State of Nature a result that is not only legally binding but also in each state's self interest *Comptes Rendus Philosophiques* ,1999 **Journal of Economic Literature** ,1999 **The Social**

Institutions of Capitalism Pursey Heugens, Hans van Oosterhout, Jack J. Vromen, 2003 Offering a diverse set of contributions to current social contracting research The Social Institutions of Capitalism illustrates how social contracts necessarily underlie and facilitate all forms of capitalist production and exchange The editors bring together novel contributions from fields as diverse as economics evolutionary game theory contract law business ethics moral philosophy and anthropology to offer multifaceted but subtly intertwined perspectives on fundamental questions concerning human cooperation This interdisciplinary book with articles written by academics who are widely known and respected in their respective fields will be of great value to those interested in political theory moral philosophy and business ethics

The Journal of Philosophy ,2000 **What Does Our Legal System Owe Future Generations?** ,2009 Cultural Identity and the Nation-State Carol Gould,Pasquale Paquino,2001-06-06 In this collection several distinguished political philosophers consider alternative models of the recognition of diverse cultures and the significance of cultural and national identity within democratic societies The impact of this recognition for conceptions of citizenship and the supposed neutrality of the democratic state is examined in the framework of economic and political globalization on the one hand and the widespread assertion of cultural and ethnic differences on the other The tension between the recognition of diverse cultures and universal frameworks of human rights is discussed as are the idea of national self determination and the new forms of democratic and civic institutions that may be required in order to deal with present political conflicts
