Science And Faith An Evangelical Dialogue:

Science and Faith Harry Lee Poe, Jimmy H. Davis, 2000 In an effort to address the tension between the basic tenets of the Christian faith and the basic doctrines of current scientific theory Poe and Davis present a non threatening way for Christians to examine their presuppositions about their faith and their views on science The Process of Buddhist-Christian Dialogue Paul O. Ingram, 2009-07-01 While process philosophers and theologians have written numerous essays on Buddhist Christian dialogue few have sought to expand the current Buddhist Christian dialogue into a trilogy by bringing the natural sciences into the discussion as a third partner This was the topic of Paul O Ingram s previous book *Buddhist Christian Dialogue in an Age of Science* The thesis of the present work is that Buddhist Christian dialogue in all three of its forms conceptual social engagement and interior are interdependent processes of creative transformation Ingram appropriates the categories of Whitehead s process metaphysics as a means of clarifying how dialogue is now mutually and creatively transforming both Buddhism and Christianity *Perspectives on Science and Christian Faith*, 2005 **The Fall of Interpretation** James K. A. Smith, 2012-04 One of the most engaging and innovative Christian scholars of our day provides an updated interaction with contemporary hermeneutical discussions **T&T Clark Handbook of Christian Theology and Climate Change** Hilda P. Koster, Ernst M. Conradie, 2019-12-12 The T these essays are critically engaged by respondents situated in other geographic regions minority communities non Christian traditions or non theological disciplines Structured in seven main parts the handbook explores 1 the need for collaboration with disciplines outside of Christian theology to address climate change 2 the need to find common moral ground for such collaboration 3 the difficulties posed by collaborating with other Christian traditions from within 4 the questions that emerge from such collaboration for understanding the story of God s work and 5 God s identity and character 6 the implications of such collaboration for ecclesial praxis and 7 concluding reflections examining whether this volume does justice to issues of race gender class other animals religious diversity geographical divides and carbon mitigation This rich ecumenical cross cultural conversation provides a comprehensive and in depth engagement with the theological and moral challenges raised by anthropogenic climate change **Theological Reflections at the Boundaries** Paul O. Ingram, 2011-11-04 The interdependence of boundary questions and the experience of cognitive dissonance reveal that knowledge in all fields of inquiry is always incomplete and tentative The issues are particularly acute for Christian theological reflection Ingram illustrates the importance of boundary questions and cognitive dissonance as a means of creatively transforming contemporary Christian theological reflection through dialogue with the natural sciences and the world s religions particularly Buddhism filtered through the lenses of Whiteheadian process philosophy **Creating Women's Theology** Monica A. Coleman, Nancy R. Howell, Helene Tallon Russell, 2011-09-22 *Creating Women s Theology* engages women s questions Can women from different religious traditions engage one theological approach Can one philosophical approach

support feminist religious thought What kind of belief follows women s criticism of traditional Christianity Creating Women s Theology offers a portrait of how some women have found room for faith and feminism For the last twenty five years women religion scholars have synthesized process philosophy with their feminist sensibilities and faith commitments to highlight the value of experience the importance of freedom and the interdependence of humanity God and all creation Cutting across cultural and religious traditions process relational feminist thought represents a theology that women have created This volume offers an introduction to process and feminist theologies before presenting selections from canonical works in the field with study questions This volume includes voices from Christianity Judaism goddess religion the Black church and indigenous religions Creating Women s Theology invites new generations of undergraduate seminary and university graduate students to the methods and insights of process relational feminist theology **Science and Faith** Hannah

Fifty Years in Science and Religion Robert J. Russell, 2004 Ian G Barbour is the internationally acknowledged pioneer in the field of science and religion Although public opinion is often swayed by strident voices which attempt to place science and religion in conflict or keep them totally isolated Barbour's voluminous contributions over the past fifty years have carved out a trusted pathway to constructive dialogue and creative mutual interaction between science and religion *Fifty Years in Science and Religion* brings together nineteen leading scholars in the field to offer an appreciative yet critical assessment of the impact of Barbour's work on science and religion and to point ahead towards future critical areas goals and tasks that await new research and visionary exploration This book includes a unique autobiography by Barbour in which for the first time he shares and reflects on his life and work and a detailed bibliography of Barbour's works Together the authors demonstrate how Barbour's writings and the hundreds of scholars who have now become part of the field have changed the course of intellectual history in the West by making possible and necessary a truly constructive engagement between science and religion in the context of inter religious dialogue and the global human and environmental challenges of our time
