Islam, Autoritarismus und Unterentwicklung Ahmet T. Kuru, 2024-11-27 Warum weisen Länder mit muslimischer Bevölkerungsmehrheit im Vergleich zum Weltdurchschnitt ein niedriges Maß an Demokratie und sozio ökonomischer Entwicklung auf Dieses Buch kritisiert Erklärungen die den Islam als Ursache dieser Ungleichheit anführen da die Muslime zwischen dem 9 und 12 Jahrhundert philosophisch und sozio ökonomisch weiter fortgeschritten waren als die Westeuropäer Auch der westliche Kolonialismus war nicht die Ursache Die Muslime litten bereits unter politischen und sozio ökonomischen Problemen als die Kolonisierung begann Dieses Buch argumentiert dass die Muslime in ihrer frühen Geschichte als in Europa religiöse Orthodoxie und Militärrherrschaft vorherrschten einflussreiche Denker und Kaufleute hatten Im 11 Jahrhundert entstand jedoch ein Bröndnis zwischen orthodoxen islamischen Gelehrten den Ulema und Militärrstaaten Dieses Bröndnis erstickte allmählich die intellektuelle und wirtschaftliche Kreativität indem es die intellektuellen und bürgerlichen Klassen in der muslimischen Welt marginalisierte Dieses Bröndnis behindert auch heute noch Kreativität und Wettbewerb in muslimischen Ländern Die Rohfassung der deutschen Übersetzung hat ein maschinelles Übersetzungsprogramm mit Hilfe künstlicher Intelligenz angefertigt Eine anschließende menschliche Bearbeitung erfolgte vor allem in inhaltlicher Hinsicht so dass sich das Buch stilistisch anders lesen wird als eine herkömmliche Übersetzung

Knowledge and Power William Burns, 2018-07-06 Knowledge and Power presents and explores science not as something specifically for scientists but as an integral part of

human civilization and traces the development of science through different historical settings from the Middle Ages through to the Cold War Five case studies are examined within this book the creation of modern science by Muslims Christians and Jews in the medieval Mediterranean the global science of the Jesuit order in the early modern world the relationship between modernization and westernization in Russia and Japan from the late seventeenth to the mid nineteenth century the role of science in the European colonization of Africa and the rivalry in big science between the United States and the Soviet Union during the Cold War Each chapter includes original documents to further the reader's understanding and this second edition has been enhanced with a selection of new images and a new chapter on Big Science and the Superpowers during the Cold War Since the Middle Ages people have been working in many civilizations and cultures to advance knowledge of and power over the natural world Through a combination of narrative and primary sources Knowledge and Power provides students with an understanding of how different cultures throughout time and across the globe approached science It is ideal for students of world history and the history of science

Platon in Bagdad John Freely, 2012-08-31 Diese Geschichte des Wissenstransfers beginnt im 7. Jahrhundert v. Chr. in Ionien an der kleinasiatischen Küste. Naturphilosophen wie Thales von Milet erforschen hier Himmel und Erde. Auf Milet folgen Athen, Alexandria, Rom und Byzanz als Zentren der Wissenschaft. Doch zu Beginn des Mittelalters geht dieses Wissen in Europa verloren. Aufbewahrt wird es in der arabischen Welt: bei den abbasidischen Bagdad, dem fatimidischen Kairo und dem omayyadischen Damaskus. Folgt Freely arabischsprachigen Gelehrten, Ärzten und Mathematikern nach Andalusien. Muslime, nestorianische Christen, Juden und Sabier bringen das verlorene Wissen im Zuge der Expansion des Islams zurück nach Europa und liefern dem Westen damit die Voraussetzung für das neue wissenschaftliche Weltbild, das in den neuen Zentren der Wissenschaft wie Paris und Oxford entsteht. Eine faszinierende Reise durch die Zeit zwischen Ost und West. Was Europa der islamischen Welt verdankt. Eine Gegenüberstellung zum Clash of Civilisations und der angeblichen Wissenschaftsfeindlichkeit des Islam

Distinguished Figures in Mechanism and Machine Science Marco Ceccarelli, 2009-12-01 This is the second volume of a series of edited books whose aim is to collect contributed papers within a framework that can serve as a collection of persons in MMS. Mechanism and Machine Science. This is a continuation of the first volume that was published in 2008, again combining very ancient and very recent scholars in order to give not only an encyclopaedic character to this project but also to emphasize the significance of MMS over time. This project has the characteristic that the papers illustrate by recognizing persons and their scientific work, mainly technical developments in the historical evolution of the fields that today are grouped in MMS. Thus emphasis is also given to biographical notes describing efforts and experiences of people who have contributed to the technical achievements whose technical survey is the core of each contributed paper. This second volume of the project has been possible thanks to the invited authors who have enthusiastically shared in this initiative and who have spent time and effort in preparing the papers. The stand-alone papers cover the wide field of the History of Mechanical Engineering with specific focus on MMS. I believe

that readers will take advantage of the papers in this book and future ones by supplying further satisfaction and motivation for her or his work historical or not

M. Ghazanfar, 2006-03-30 Review Islamic Civilization History Contributions and Influence A Compendium of Literature is a window to literature pertaining to Islamic history and Islam's contributions to knowledge and its influence in medieval Europe The book is unique in that it presents more than mere annotations it is a collection of literature briefs detailed and focused descriptions of each of the more than six hundred books and articles covered In the post 9 11 environment there has been a surge of interest regarding all things Islamic While much of the new literature is refreshingly positive some works demonstrate a revival of centuries old misconceptions about the Islamic world Islamic Civilization examines that dichotomy through literature that the author has accumulated over the past twenty years in connection with other research endeavors concerning early Islamic social thought thus most references have a social science humanities orientation Students research scholars and professionals will find this bibliography full of useful resources and a stimulus for further reading BOOK JACKET *The Journal of Medieval and Early Modern Studies*, 1998 *Forthcoming Books* Rose Arny, 1997 Southwest Philosophical Studies, 1996
