PBB, an American Tragedy Edwin Chen, 1979 An account of the man made disaster in American agriculture that occurred in 1973 when Michigan's food supply was contaminated with the toxic chemical PBB ABA Journal, 1980-08 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association **Civic Empowerment in an Age of Corporate Greed** Edward C. Lorenz, 2012-04-01 A thought provoking investigation of an urgent issue facing American communities today Edward C. Lorenz's book examines the intersection of corporate irresponsibility and civic engagement At the heart of this case study is a group of firms responsible for seven of the most contaminated Superfund sites in the United States the largest food contamination accident in U S history stunning stock and financial manipulations and a massive shift of jobs off shore In the face of these egregious environmental employee and investor abuses several communities impacted by these firms organized to confront and combat failures in corporate and bureaucratic leadership winning notable victories over major financiers lobbyists and indifferent or ineffective government agencies A critical analysis of public and private leadership business and economic ethics and civic life this book concludes with a stirring blueprint for other communities facing similarly overwhelming opposition Untold Story of Milk, Revised and Updated Ron Schmid, 2009-03-25 The role of raw milk in the rise of civilization the milk problem that led to compulsory pasteurization the politics of the dairy industry Revised and updated with the latest scientific studies documenting the safety and health benefits of raw milk Raw milk is a movement whose time has come This book will serve as a catalyst for that movement providing consumers with the facts and inspiration they need to embrace Nature's perfect food *The Rural Midwest Since World War II* J. L. Anderson, 2014-02-01 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show

through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own
