Contraception Alice Pelton, Frances Yarlett, Melanie Davis-Hall, 2025-04-24 The choices we make with our contraception can have wide ranging consequences for our health and yet as a recent survey showed nearly 80 per cent of women continue to suffer with side effects Is this good enough in the 21st century Choosing the right option is a frequently bewildering journey littered with trial and error misinformation and confusion With so many pill brands on the market each

with different formulations and potential side effects it can feel impossible to find the one that's right for us. We are also often left in the dark as our needs change over the course of our lives whether it's after having children developing health issues or navigating perimenopause. Enriched with experiences from thousands of users of The Lowdown, the world's first contraceptive review platform and community, the medical expertise of their in-house team and the latest clinical guidance and scientific research, *Contraception* is a book for anyone who wants to take control of their health. This comprehensive resource provides valuable insights into your reproductive health covering topics such as managing conditions like endometriosis and PCOS, understanding what to expect during an abortion, planning for pregnancy after using contraception and navigating the changes that come with menopause. With zero bias or BS, this book is your essential guide to separating the myths from the medicine.

Women's Health Advocacy Jamie White-Farnham, Bryna Siegel Finer, Cathryn Molloy, 2019-07-17

Women's Health Advocacy brings together academic studies and personal narratives to demonstrate how women use a variety of arguments, forms of writing and communication strategies to effect change in a health system that is not only often difficult to participate in but which can be actively harmful. It explicates the concept of rhetorical ingenuity, the creation of rhetorical means for specific and technical yet extremely personal situations. At a time when women's health concerns are at the center of national debate, this rhetorical ingenuity provides means for women to uncover latent sources of oppression in women's health and medicine and to influence matters of research funding, policy and everyday access to healthcare in the face of exclusion and disenfranchisement. This accessible collection will be inspiring reading for academics and students in health communication, medical humanities and women's studies as well as for activists, patients and professionals.
