The Rise of Gospel Blues Michael W. Harris, 1994-06-23 Most observers believe that gospel music has been sung in African American churches since their organization in the late 1800s Yet nothing could be further from the truth as Michael W Harris s history of gospel blues reveals Tracing the rise of gospel blues as seen through the career of its founding figure Thomas Andrew Dorsey Harris tells the story of the most prominent person in the advent of gospel blues Also known as Georgia Tom Dorsey had considerable success in the 1920s as a pianist composer and arranger for prominent blues singers including Ma Rainey In the 1930s he became involved in Chicago s African American old line Protestant churches where his background in the blues greatly influenced his composing and singing Following much controversy during the 1930s and the eventual overwhelming response that Dorsey s new form of music received the gospel blues became a major force in African American churches and religion His more than 400 gospel songs and recent Grammy Award indicate that he is still today the most prolific composer publisher in the movement Delving into the life of the central figure of gospel blues Harris illuminates not only the evolution of this popular musical form but also the thought and social forces that forged the culture in which this music was shaped *Music of Hindu Trinidad* Helen Myers, 1998 Like many other small towns in Trinidad Felicity is populated almost entirely by East Indians In their Caribbean exile the residents of Felicity have created and recreated the music of their Hindu ancestors *Music of Hindu Trinidad* is a fascinating account of the history and cultural significance of Hindu music that explores its symbolic aesthetic and psychological aspects while asking the larger question of how this music has contributed to the formation of identity in the midst of their great diaspora Myers details the musical repertory of Felicity which is based largely on north Indian genres including the traditional Bhojpuri folk songs and drumming styles brought by the first indentured laborers in 1845 In her engaging exploration of the fate of Indian classical music and new popular styles such as Hindi calypso soca and chutney she even finds herself at the ancestral home of Trinidadian V S Naipaul in India Copiously illustrated and accompanied by a compact disk *Music of Hindu Trinidad* is a model ethnographic study The harmonia Louis Charles Elson, 1878 *Music in The Girl's Own Paper: An Annotated Catalogue, 1880-1910* Judith Barger, 2016-09-13 Nineteenth century British periodicals for girls and women offer a wealth of material to understand how girls and women fit into their social and cultural worlds of which music making was an important part The Girl s Own Paper first published in 1880 stands out because of its rich musical content Keeping practical usefulness as a research tool and as a guide to further reading in mind Judith Barger has catalogued the musical content found in the weekly and later monthly issues during the magazine s first thirty years in music scores instalments of serialized fiction about musicians music related nonfiction poetry with a musical title or theme illustrations depicting music making and replies to musical correspondents

The book's introductory chapter reveals how content in *The Girl's Own Paper* changed over time to reflect a shift in women's music making from a female accomplishment to an increasingly professional role within the discipline using the piano girl as a case study. A comparison with musical content found in *The Boy's Own Paper* over the same time span offers additional insight into musical content chosen for the girls' magazine. A user's guide precedes the chronological annotated catalogue; the indexes that follow reveal the magazine's diversity of approach to the subject of music.

Art and Ocean Objects of Early Modern Eurasia Anna Grasskamp, 2025-10-01 During the early modern period objects of maritime material culture were removed from their places of origin and traded, collected and displayed worldwide. Focusing on shells and pearls exchanged within local and global networks, this monograph compares and connects Asian, in particular Chinese and European, practices of oceanic exploitation in the framework of a transcultural history of art with an understanding of maritime material culture as gendered. Perceiving the ocean as mother of all things as womb and birthplace, Chinese and European artists and collectors exoticized and eroticized shells' shapes and surfaces. Defining China and Europe as spaces entangled with South and Southeast Asian sites of knowledge production, source and supply between 1500 and 1700, the book understands oceanic goods and maritime networks as transcending and subverting territorial and topographical boundaries. It also links the study of globally connected port cities to local ecologies of oceanic exploitation and creative practices.

Gems in the Early Modern World Michael Bycroft, Sven Dupré, 2018-11-27 This edited collection is an interdisciplinary study of gems in the early modern world. It examines the relations between the art, science and technology of gems and it does so against the backdrop of an expanding global trade in gems. The eleven chapters are organised into three parts. The first part sets the scene by describing how gems moved around the early modern world, how they were set in motion and how they were pulled together in the course of their travels. The second part is about value. It asks why people valued gems, how they determined the value of a given gem and how the value of a gem was connected to its perceived place of origin. The third part deals with the skills involved in cutting, polishing and mounting gems and how these skills were transmitted and articulated by artisans. The common themes of all these chapters are materials knowledge and global trade. The contributors to this volume focus on the material properties of gems such as their weight and hardness, on the knowledge involved in exchanging them and valuing them and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas.
