Trade And Transformation In Korea, 1876-1945 Dennis McNamara, 2019-05-20 Exploring the interaction among system state and society this book illuminates the social and economic history of late nineteenth and early twentieth century colonial Korea Dennis McNamara argues that transformation within and trade abroad led by rice exports spurred Korea s shift from isolation to inclusion in a modern regional system In his The North Korean Revolution, 1945-1950 Charles K.

Armstrong, 2013-05-15 North Korea despite a shattered economy and a populace suffering from widespread hunger has outlived repeated forecasts of its imminent demise Charles K Armstrong contends that a major source of North Korea s strength and resiliency as well as of its flaws and shortcomings lies in the poorly understood origins of its system of government He examines the genesis of the Democratic People s Republic of Korea DPRK both as an important yet rarely studied example of a communist state and as part of modern Korean history North Korea is one of the last redoubts of unreformed Marxism Leninism in the world Yet it is not a Soviet satellite in the East European manner nor is its government the result of a local revolution as in Cuba and Vietnam Instead the DPRK represents a unique indigenization of Soviet Stalinism Armstrong finds The system that formed under the umbrella of the Soviet occupation quickly developed into a

nationalist regime as programs initiated from above merged with distinctive local conditions Armstrong's account is based on long classified documents captured by U S forces during the Korean War This enormous archive of over 1.6 million pages provides unprecedented insight into the making of the Pyongyang regime and fuels the author's argument that the North Korean state is likely to remain viable for some years to come

Colonial Modernity in Korea Gi-Wook Shin, Michael Edson Robinson, 1999 The twelve chapters in this volume seek to overcome the nationalist paradigm of Japanese repression and exploitation versus Korean resistance that has dominated the study of Korea's colonial period 1910-1945 by adopting a more inclusive pluralistic approach that stresses the complex relations among colonialism modernity and nationalism By addressing such diverse subjects as the colonial legal system radio telecommunications the rural economy and industrialization and the formation of industrial labor one group of essays analyzes how various aspects of modernity emerged in the colonial context and how they were mobilized by the Japanese for colonial domination with often unexpected results A second group examines the development of various forms of identity from nation to gender to class particularly how aspects of colonial modernity facilitated their formation through negotiation contestation and redefinition

Selling the Future Ryan Moran, 2024-01-15 In *Selling the Future* Ryan Moran explains how the life insurance industry in Japan exploited its association with mutuality and community to commodify and govern lives Covering the years from the start of the industry in 1881 through the end of World War II Moran describes insurance companies and government officials working together to create a picture of the future as precarious and dangerous Since it was impossible for individual consumers to deal with every contingency on their own insurance industry administrators argued that their usage of statistical data enabled them to chart the predictable future for the aggregate Through insurance companies and the state thus offered consumers a means to a perfectible future in an era filled with repeated crises Life insurance functioned as an important modernist technology within Japan and its colonies to instantiate expectations for responsibility to reconfigure meanings of mutuality and to normalize new social formations such as the nuclear family as essential to life Life insurance thus offers an important vehicle for examining the confluence of modes of mobilizing and organizing bodies the expropriation of financial resources and the action of disciplining workers into a capitalist system
