The Peasants of Languedoc Emmanuel Le Roy Ladurie, 1976 This volume combines elements of human geography historical demography economic history and folk culture in a depiction of a great agrarian cycle lasting from the Renaissance to the Enlightenment It describes the conflicts and contradictions of a traditional peasant society in whic the rise in population was not matched by increases in wealth and food production The Peasants of Languedoc Emmanuel Le Roy Les Paysans de Languedoc Emmanuel Le Roy Ladurie, 1966 The Historical Present Walter Kudrycz, 2011-03-17 The changing understandings of the Middle Ages from the Age of Reason to the present and how these relate to wider historiographical and philosophical developments **Population Growth and Agrarian Change** David B. Grigg, 1980-12-18 This book first published in 1980 suggests some ways of looking at the interrelationships between population growth and agrarian change and uses these approaches to consider the demographic and agrarian problems of various parts of Europe in the past in the fourteenth century the sixteenth and early seventeenth centuries and in the early Truth in Science, the Humanities and Religion International Balzan Foundation, 2010-06-14 by nineteenth century the Academies of the two countries to the Italian Swiss University of Lugano for the two day Symposium The question of the meaning of truth is central to many areas of contemporary debate whether between those subscribing to a post Enlightenment view of the world and those who seek fundamental truth in religious texts or between those maintaining that there are absolute truths and those believing facts to be social constructs For some the ultimate truth is revealed through religious faith and t tual authority Can this view be reconciled with an evidence based materialist post Enlightenment perspective of the truth as embraced by the natural sciences If religion holds the key to the truth which religion and which truths During the five thematic sessions of the symposium all attended by the same audience and by all the speakers and panel members these and many other gu tions but in particular the one about the meaning of truth were examined and debated The whole range of perspectives represented on the panels and in the au ence came to the fore After the keynote lecture by Professor Simon Blackburn the five sessions covered the following disciplines philosophy mathematics physics cosmology the biological sciences including biodiversity and sustainability h tory the social sciences theology and religion This volume contains the speakers lectures the corresponding reactions of the invited panel members as well as the panel and general discussions of the two d symposium Peasants and Production in the Medieval North-East Ben Dodds, 2007 Evidence from unused sources sheds much light on the peasant economy of the later middle ages The peasant economy in north east England and indeed throughout the country as a whole underwent many changes during the later Middle Ages but owing to the lack of evidence it has been difficult to come to definite conclusions. This pioneering survey uses previously unexploited sources principally from tithe data to offer new interpretations of the patterns for change and the scope for adaptability The author argues that the peasant economy in this region of England was profoundly affected by war in the

early fourteenth century and then disease with the arrival of the Black Death in 1349 calling into question the orthodox theories of overpopulation in explaining the crisisof the late Middle Ages even at its medieval peak the population of northeast England was sparse by comparison with areas further south Nor did the availability of land and improved living standards lead to demographic recovery in the fifteenth and early sixteenth centuries He also shows that despite their vulnerability to crises peasant cultivators were highly responsive to change Far from being primitive subsistence farmers oblivious to the marketand its signals medieval peasants in the Durham region were subtle and successful decision makers regarding the production and marketing of their output BEN DODDS is Lecturer in History at the University of Tallahassee

Cultures of Darkness Bryan D. Palmer,2000-11 Constructing a rich tapestry of example and experience spanning eight centuries Palmer s fascinating account details lives of exclusion and challenge as the night travels of the transgressors clash repeatedly with the powerful conventions of their times Nights of liberation and exhilarating desire are at the heart of this study but so too are the dangers cloaked in darkness Palmer reveals those hidden spaces where darkness concealed acts of brutalizing terror or alternately provided refuge solace or freedom Using the night as metaphor and unifying theme Palmer takes an unflinching look at those dissident or oppositional cultures and movements and shows how they were fueled and shaped by the rise and transformation of capitalism Book Jacket
