

Common Pediatric Malignancies

Deepak Viswanath, DN Umashankar, R Mahesh Kumar

ABSTRACT

Childhood cancer is not a single disease, but includes a variety of malignancies in which abnormal cells divide in an uncontrolled manner. Childhood cancers vary by type of histology, site of disease origin, race, sex, and age. The axiom that 'children are not little adults' has long been applied to the management of pediatric patients, and it certainly applies to cancer patients. Most pediatric cancers differ quite significantly from adult cancers in several important ways including: (1) incidence, (2) underlying etopathogenesis, (3) response rates, (4) outcomes and (5) biology. Unlike adult cancers, childhood cancer remains a rare event, affecting approximately 15 per 100,000 children annually. The most common pediatric solid tumors include brain tumors (25%), lymphomas (10%), neuroblastoma (8%), Wilms tumor (6%), and bone tumors (5%).

INTRODUCTION

Cancer is a relatively rare disease in children with an annual frequency of 13 to 14 in 100,000 children up to 15 years.¹ It accounts for less than 1% of all cancer in industrialized countries. However, cancer represents the second leading cause of childhood death in children 1 to 14 years old in developed countries, following accidents. Leukemia and lymphoma represent the most frequent pediatric malignancies (about 35 and 12%), followed by tumors of the central nervous system (CNS) (about 17%). All other entities are less frequent-bone tumors (5%), soft tissue tumors (7%), neuroblastoma (8%), nephroblastoma (7%), and germ-cell tumors (about 4%).^{1,2} Several types of these malignancies are specific to children, in particular the 'blastoma'-type.

CLASSIFICATION OF CHILDHOOD CANCERS

It has been established firmly that, for children, classification of tumors should be based on morphology rather than, as in adults, the primary site of origin. Ever-improving diagnostic methods, based on genetic studies and pathologic studies, have prompted a third edition of the ICD-O (ICD-O-3),³ to bring forth the new classification.
