Nowotny, 2012-12-06 BERNW ARD JOERGES AND HELGA NOWOTNY YET ANOTHER TURN The thing that doesn't fit is the thing that's most interesting Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters The Theatre of Nuclear Science Jeanne Tiehen, 2021-11-28 The Theatre of Nuclear Science theoretically explores theatrical representations of nuclear science to reconsider a science that can have consequences beyond imagination Focusing on a series of nuclear science plays that span the twentieth and twenty-first centuries and including performances of nuclear science in museums film and media Jeanne Tiehen argues why theatre and its unique qualities can offer important perspectives on this imperative topic This book will be of great interest to students and scholars of theatre politics and literature **Science and Scientists** John Gerard, 1899 **Looking Ahead with Science**, 1960 **Searching for Stormy Weather with a Scientist** Judith A.
