Trinity Parkway, from IH-35E/SH-183 to US-175/SH-310, Dallas County, 2005 *Chasing Shadows* Ronald J. Deibert, 2025-02-04 In this real life espionage thriller cyber security expert Ronald Deibert uncovers the unseemly marketplace for high tech surveillance professional disinformation and computerized malfeasance and reveals how his team of digital sleuths at the Citizen Lab have lifted the lid on dozens of spy cases targeting innocent citizens around the world He recounts how the Lab exposed the world's pre eminent cyber mercenary firm Israel based NSO Group the creators of the phone hacking marvel Pegasus in a series of human rights abuses from domestic spying scandals in Spain Poland Hungary and Greece to its implication in the murder of Washington Post journalist Jamal Khashoggi in 2018 Today NSO Group once valued at over a billion dollars faces plummeting worth and an irretrievably tarnished reputation *Chasing Shadows* provides a front row seat to a dark underworld of digital espionage sabotage and subversion where autocrats and dictators peer into their targets lives with the mere press of a button spreading their tentacles of authoritarianism through a digital ecosystem that is insecure invasive by design poorly regulated and prone to abuse The brave activists opposition figures and journalists who dare to advocate for basic political rights and freedoms are hounded arrested tortured and sometimes murdered

Blaisdell, 1998 On 7 February 1994 a C 141 departed Christchurch New Zealand and landed on the 3050 m 10 000 ft Pegasus glacial ice runway located on the Ross Ice Shelf 13 km 8 miles south of McMurdo Antarctica This event marked the final test for a five year development program to demonstrate the feasibility of a semipermanent glacial ice runway capable of supporting heavy wheeled aircraft at a site easily accessible to McMurdo In the later phases of developing the glacial ice runway numerous working flights of LC 130s operating on wheels rather than skis moved cargo more efficiently to the South Pole and the LC 130 and a C 130 carried larger passenger loads to Christchurch The primary benefit of the Pegasus runway to the U S Antarctic Program is its ability to support heavy wheeled aircraft for most of the period of mid January through November In the past only ski equipped aircraft could land in the McMurdo area during this time period The Pegasus runway allows increased payloads for the LC 130 an additional 3600 kg or 8000 lb takeoff weight when using wheels and provides access for virtually any conventional aircraft The technology for siting constructing maintaining and operating such a runway is now well understood and is described in detail in this comprehensive report **Hearings** United States.
