Preferences And Decisions Under Incomplete Knowledge:

Preferences and Decisions under Incomplete Knowledge Janos Fodor, Bernard De Baets, Patrice Perny, 2014-10-05 Nowadays decision problems are pervaded with incomplete knowledge i.e. imprecision and/or uncertain information both in the problem description and in the preferential information. In this volume leading scientists in the field address various theoretical and practical aspects related to the handling of this incompleteness. The problems discussed are taken from multi-objective linear programming, rationality considerations in preference modelling, non-probabilistic utility theory, data fusion, group decision making and multicriteria decision aid. The book is oriented towards researchers, graduate and postgraduate students in decision analysis, fuzzy sets and fuzzy logic, and operations research/management science. *Multiple Criteria Decision Analysis: State of the Art Surveys* Salvatore Greco, 2006-01-20 *Multiple Criteria Decision Analysis: State of the Art Surveys* provides survey articles and references of the seminal or state-of-the-art research on MCDA. The material covered ranges from the foundations of MCDA over various MCDA methodologies, outranking methods, multiattribute utility and value theories, non-classical approaches to multiobjective mathematical programming, MCDA applications and software. This vast amount of material is organized in 8 parts with a total of 25 chapters. More than 2000 references are listed. **Intelligent Decision and Policy Making Support Systems** Da Ruan, Frank Hardeman, Klaas van der Meer, 2008-04-24 This edited book reports recent research results and provides a state-of-the-art on intelligent decision support systems, applications, lessons learned, and future research directions. The book covers a balanced mixture of theory and practice, including new methods and developments of intelligent decision support systems applications in Society and Policy Support. Its main objective is to gather a peer-reviewed collection of high-quality contributions in the relevant topic areas. *Dynamic Perspectives on Managerial Decision Making* Herbert Dawid, Karl F. Doerner, Gustav Feichtinger, Peter M. Kort, Andrea Seidl, 2016-09-15 This volume collects research papers addressing topical issues in economics and management with a particular focus on dynamic models which allow to analyze and foster the decision making of firms in dynamic complex environments. The scope of the contributions ranges from daily operational challenges firms face to strategic choices in dynamic industry environments and the analysis of optimal growth paths. The volume also highlights recent methodological developments in the areas of dynamic optimization, dynamic games, and meta-heuristics which help to improve our understanding of optimal decision making in a fast-evolving economy. **Preferences and Decisions under Incomplete Knowledge** Janos Fodor, Bernard De Baets, Patrice Perny, 2000-05-16 Nowadays decision problems are pervaded with incomplete knowledge i.e. imprecision and/or uncertain information both in the problem description and in the preferential information.
