Sutherland, John M. Stowers, 1984 *Controversies in Diabetes and Pregnancy* Lois Jovanovic, 2012-12-06 As I read this unique volume on diabetes and pregnancy edited by Lois Jovanovic I was struck by two themes that run throughout these collected chapters First this volume provides an excellent assessment of past problems present management and future challenges presented by diabetes in pregnancy Orury's unique longitudinal experience with diabetes in pregnancy provides the reader with an important overview as does Coetzee's discussion of gestational diabetes Current problems determining the etiology and prevention of congenital malformations in infants of diabetic mothers 10M assessment of antepartum fetal condition management of pregnant patients with diabetic retinopathy recognition of thyroid dysfunction in the pregnant diabetic woman and understanding the multitude of metabolic sequelae observed in the 10M are thoroughly reviewed Finally important considerations for future treatment and therapy such as the adaptation of the fetal pancreas to the disordered intra uterine environment often seen in maternal diabetes the use of fetal pancreatic tissue for transplantation the application of exercise in the management of the pregnant woman with diabetes and the long term consequences for the 10M provide an exciting glimpse into the future The second important theme that emerges is the critical role the problem of diabetes in pregnancy has played in our understanding of maternal and fetal physiology Clinical observations supported by basic research have emphasized the role of fetal fuels in teratogenesis *Über die Häufigkeit von Missbildungen bei Kindern diabetischer Mütter* Heidi Lührs-Höper, 1982 **Management of the Diabetic Pregnancy** Bahij S. Sutherland,John M. Stowers,Donald W.M. Pearson,2012-12-06 Traditions are dangerous doubly so in science Traditions are unchanging science is about change This was the 4th International Colloquium on Carbohydrate Metabolism in Pregnancy and the Newborn to be held in Aberdeen and by now the form is set How much its content has changed is a matter of nice judgement and not under the control of the organizers It is not within their power to bring news of revolution if there has been no revolution Certainly many of the speakers had kent faces from previous Aberdeen meetings but so they would be at any meeting on diabetes anywhere in the world The written proceedings of scientific conferences have purposes other than to record changes sometimes they need to state a consensus The 3rd Colloquium came to an agreement about the importance of prepregnancy recognition and control of abnormalities of carbohydrate metabolism The 4th set out to examine what results it had achieved Much of this book is taken up with follow up studies of the applications of similar regimes in different parts of the world Since the first Aberdeen meeting in 1973 progress in the manage ment of diabetic pregnancy has been slow and steady but the change in the city and the society where the meetings took place has been fast **Diabetes Mellitus in Pregnancy** E. in 1973 The papers presented dealt with not only the physiological aspects of pregnancy and diabetes such as maternal fetal metabolic interrelationships and renal handling of glucose but the advances in understanding the endocrine system the histology of the fetal pancreas and clinical care and diagnosis of diabetic pregnancies Scientific methods of investigating pregnancy and the newborn infant have evolved into an interdisciplinary approach which contributes to early diagnosis understanding the influence of the fetus on pregnancy outcome the importance of genetics and many other aspects of diabetes and pregnancy *Diabetes and Pregnancy* Lois Jovanovic, Charles Peterson, Kurt Fuhrmann, 1986-05-15
