## **Prehistoria De Europa:**

The Archaeology of Iberia Margarita Diaz-Andreu, Simon Keay, 2013-12-02 For many archaeologists Iberia is the last great unknown region in Europe Although it occupies a crucial position between South Western Europe and North Africa academic attention has traditionally been focused on areas like Greece or Italy However Iberia has an equally rich cultural heritage and archaeological tradition This ground breaking volume presents a sample of the ways in which archaeologists have applied theoretical frameworks to the interpretation of archaeological evidence offering new insights into the archaeology of both Iberia and Europe from prehistoric time through to the tenth century The contributors to this book are leading archaeologists drawn from both countries They offer innovative and challenging models for the Paleolithic Neolithic Copper Age Bronze Age Iron Age Roman Early Medieval and Islamic periods A diverse range of subjects are covered including urban transformation the Iron Age peoples of Spain observations on historiography and the origins of the Arab domains of Al Andalus It is essential reading for advanced undergraduates and those researching the archaeology of the Iberian Peninsula

**Celtic Art in Europe** Christopher Gosden, Sally Crawford, Katharina Ulmschneider, 2014-08-29 The ancient Celtic world evokes debate discussion romanticism and mythicism On the one hand it represents a specialist area of archaeological interest on the other it has a wide general appeal The Celtic world is accessible through archaeology history linguistics and art history Of these disciplines art history offers the most direct message to a wider audience This volume of 37 papers brings together a truly international group of pre eminent specialists in the field of Celtic art and Celtic studies It is a benchmark volume the like of which has not been seen since the publication of Paul Jacobsthal s Early Celtic Art in 1944 The papers chart the history of attempts to understand Celtic art and argue for novel approaches in discussions spanning the whole of Continental Europe and the British Isles This new body of international scholarship will give the reader a sense of the richness of the material and current debates Artefacts of rich form and decoration which we might call art provide a most sensitive set of indicators of key areas of past societies their power politics and transformations With its broad geographical scope this volume offers a timely opportunity to re assess contacts context transmission and meaning in Celtic art for understanding the development of European cultures identities and economies in pre and proto history Nominated for Current Archaeology Book of the Year 2016      **1960-1962** ,2022-08-01 Keine ausf hrliche Beschreibung f r 1960 1962 verf gbar      The Megalithic Architectures of Europe Luc Laporte, Chris Scarre, 2015-12-31 Megalithic monuments are among the most striking remains of the Neolithic period of northern and western Europe and are scattered across landscapes from Pomerania to Portugal Antiquarians and archaeologists early recognized the family resemblance of the different groups of tombs attributing them to maritime peoples moving along the western seaways More recent research sees them rather as the product of established early farming communities in their individual regions Yet the diversity of the tombs their chronologies and their varied cultural contexts complicates any straightforward understanding of their origins and distribution Megalithic

Architectures provides new insight by focusing on the construction and design of European megalithic tombs on the tomb as an architectural project. It shows how much is to be learned from detailed attention to the stages and the techniques through which tombs were built, modified and enlarged and often intentionally dismantled or decommissioned. The large slabs that were employed often unshaped may suggest an opportunistic approach by the Neolithic builders but this was clearly far from the case. Each building project was unique and detailed study of individual sites exposes the way in which tombs were built as architectural, social and symbolic undertakings. Alongside the manner in which the materials were used it reveals a store of knowledge that sometimes differed considerably from one structure to another even between contemporary monuments within a single region. The volume brings together regional specialists from Scandinavia, Germany, Britain, France, Belgium and Iberia to offer a series of uniquely authoritative studies. Results of recent fieldwork are fully incorporated and much of the material is published here for the first time in English. It provides an invaluable overview of the current state of research on European megalithic tombs.

*The Orce Man* Miquel Carandell Baruzzi, 2020-11-30. In *The Orce Man Controversy: Media and Politics in Human Origins Research*. Miquel Carandell presents a thrilling story of a controversy on an Spanish First European that involved scientists, politicians and newspapers. In the early 1980s, with Spanish democracy in its beginnings, the Orce bone was transformed from a famous human ancestor to an apparently ridiculous donkey remain. With a chronological narrative, this book is not centered on whether the bone was human or not but on the circumstances that made a certain claim credible or not from both the scientific community and the general public. Carandell's analysis draws on the thin line that separates success from failure and the role of media and politics in the controversy.
