## **Rational Changes In Science:**

**Rational Changes in Science** Joseph C. Pitt, Marcello Pera, 2012-12-06 THE PROBLEMS OF SCIENTIFIC RATIONALITY Fashion is a fickle mistress Only yesterday scientific rationality enjoyed considerable attention consideration and even reverence among philosophers but today's fashion leads us to despise it and the matron rejected and abandoned as Hecuba complains *modo maxima rerum tot generis natisque potens nunc trahor exui inops* to cite Kant for our purpose who cited Ovid for his Like every fashion ours also has its paradoxical aspects as John Watkins correctly reminds in an essay in this volume Enthusiasm for science was high among philosophers when significant scientific results were mostly a promise it declined when that promise became an undeniable reality Nevertheless as with the decline of any fashion even the revolt against scientific rationality has some reasonable grounds If the taste of the philosophical community has changed so much it is not due to an incident or a whim This volume is not about the history of and reasons for this change Instead it provides a view of the new emerging image of scientific rationality in both its philosophical and historical aspects In particular the aim of the contributions gathered here is to focus on the concept around which the discussions about rationality have mostly taken place scientific change *Postmodern Climate Change* Leigh Glover, 2007-01-24 A much needed analysis of international climate change politics as a key issue of modernity and in the context of environmentalism Leigh Glover presents a new way to understand the climate change problem and is concerned with problems of modernity and postmodernity in the context of contemporary environmental thought Focusing on the international politics surrounding the UN agreement of climate change the Framework Convention on Climate Change and its Kyoto Protocol Glover examines the issue using the key aspects of climate change science global environmental politics and global environmental management The Realistic Assumptions of Modern Science Examined Thomas Martin Herbert, 1879 **Logic, Methodology and Philosophy of Science**, 1973 The Justification of Science and the Rationality of Religious Belief Michael C. Banner, 1990 In this critical examination of recent accounts of the nature of science and of its justification given by Kuhn Popper Lakatos Laudan and Newton Smith Banner contends that models of scientific rationality which are used in criticism of religious beliefs are in fact often inadequate as accounts of the nature of science He argues that a realist philosophy of science both reflects the character of science and scientific justifications and suggests that religious belief could be given a justification of the same sort **The Bulletin of the Hegel Society of Great Britain**, 1990 *The Works of Orestes A.
