Schools Markets And Choice Policies:

Schools, Markets and Choice Policies Stephen Gorard, John Fitz, Chris Taylor, 2003 Resulting from research conducted into choice in secondary education this text provides context analysis and discussion In assessing the impact of choice policies not only upon the education system but also upon wider society it provides insight into economic and social segregation

Class Strategies and the Education Market Stephen J. Ball, 2003-08-29 Class Strategies and the Education Market examines the ways in which the middle classes maintain and improve their social advantages in and through education Drawing on an extensive series of interviews with parents and children this book identifies key moments of decision making in the construction of the educational trajectories of middle class children Stephen J Ball organises his analysis around the key concepts of social closure social capital values and principles and risk while bringing a broad range of up to date sociological theory to bear upon his subject From this thorough analysis valuable and thought provoking insights emerge into the assiduous care and considerable effort and expenditure which goes into ensuring the educational success of the middle class child The middle classes are a sociological enigma presenting the social researcher with considerable analytic and theoretical difficulties Class Strategies and the Education Market provides a set of working tools for class analysis and the examination of class practices Above all it offers new ways of thinking about class theory and the relationships between classes in late modern society

Policy Options for Interventions in Failing Schools Connor P. Spreng, 2005 Discusses the theory underlying various responses to the problem of failing schools including parental choice and government interventions Examines New Zealand's experience with failing schools and intervention strategies in underperforming schools in California applies the results of the research education reform in the Emirate of Qatar

Environment & Planning, 2012

City Schools and City Politics John Portz, Lana Stein, Robin R. Jones, 1999 An explanation of why some US cities are better at educational reform than others It relates education to politics showing how the whole village can be mobilized to better educate tomorrow's citizens It is based on an 11 city study of civic capacity and urban education

Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael

Timpane, Roger W. Benjamin, 2000 Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens Meanwhile our country's diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be

redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future *To Educate a Nation* Carl F. Kaestle, Alyssa E. Lodewick, 2007

Eleven stimulating essays using case studies of major cities and their schools suggest what might be done to better foster equity and diversity in educating American public schoolchildren highlighting the complications inherent in today's education system and providing a framework for grappling with these problems **Public Policy Decision Making and Regulation**

Douglas G. Hartle, 1979 From the Executive Summary The study attempts to provide a conceptual framework that will assist the reader in understanding the factors that primarily determine a government's decision to adopt a particular regulation The competition among parties for electoral support the circumstances under which special interest groups can be formed and exert pressure on ministers and officials the perceptual limitations of the electorate and the use of rules and procedures to bias the outcome of regulatory bodies are considered Some hypothetical illustrations are also offered as a means of conveying how the framework can be applied to the analysis of several distinct types of regulations **No Child Left**

Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn, 2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W. Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country's long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and

social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform

Michigan Educational Policy and Values Bradley Robert Carl,2004 *CSA Political Science & Government* ,2001 **School Efficiency, Social Stratification, and School Choice** Yongmei Ni,2007 **Reports from Select Committees of the House of Commons, and Evidence, Communicated to the Lords** Great Britain. Parliament. House of Lords,1886

Politics and Policy-making in Israel's Education System Hayim Gazi'el,1996 The first comprehensive book in English to describe and analyse the structure of Israel s educational system from a political and policy making perspective

The Politics of Urban Development Clarence Nathan Stone,Heywood T. Sanders,1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories The Politics of Urban Development argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference

Political Science, Government, and Public Policy Series. Annual Supplement Universal Reference System,1972 School Choice in Michigan Matthew Joseph Brouillette,1999 This primer explains school choice historically reviewing the origins and growth of tax funded schools nationwide and how they became synonymous with public education It examines the rise of government funded and operated schools in Michigan through the efforts of Isaac Crary and John Pierce and describes the negative effects of a 1970

state constitutional amendment that severely restricts parents ability to exercise school choice The primer demonstrates the failure of many past and present education reforms including ever increasing funding to significantly improve the quality of government education and it explains different types of school choice including intra and inter district choice charter schools tuition vouchers and tax credits Finally it evaluates the progress of school choice programs available nationwide identifies individuals and organizations who support oppose or are ambivalent to greater school choice in Michigan and outlines strategic plans that parents and other concerned citizens can follow to get involved in efforts to improve education through greater school choice Appendixes include a glossary a sample illustration of how to advocate for school choice with letters to the editor of local newspapers and a list of where to go for more information on this and other education issues Contains 175 endnotes SM

The New Localism in American Education Robert L. Crowson, Jr., Ellen B. Goldring, 2009-12-08 This yearbook defines and discusses the new spirit of localism in education Papers explore and describe the new spirit of localism in education Advocates a refocus on relationships between schools and local communities in the context of educational objectives Published on behalf of the National Society for the Study of Education
