**Chemical Technology in Ancient Mesopotamia** Martin Levey,1959 **History of Science: Ancient and medieval science from the beginnings to 1450** René Taton,1964 Before Nature Francesca Rochberg,2022-12-22 In the modern West we take for granted that what we call the natural world confronts us all and always has but Before Nature explores that almost unimaginable time when there was no such conception of nature no word reference or sense for it Before the concept of nature formed over the long history of European philosophy and science our ancestors in ancient Assyria and Babylonia developed an inquiry into the world in a way that is kindred to our modern science With Before Nature Francesca Rochberg explores that Assyro Babylonian knowledge tradition and shows how it relates to the entire history of science From a modern Western perspective a world not conceived somehow within the framework of physical nature is difficult if not impossible to imagine Yet as Rochberg lays out ancient investigations of regularity and irregularity norms and anomalies clearly

established an axis of knowledge between the knower and an intelligible ordered world Rochberg is the first scholar to make a case for how exactly we can understand cuneiform knowledge observation prediction and explanation in relation to science without recourse to later ideas of nature Systematically examining the whole of Mesopotamian science with a distinctive historical and methodological approach Before Nature will open up surprising new pathways for studying the history of science
