

SEXUAL SELECTION

It is a special form of natural selection in which the mating preferences of one sex determine the phenotype of the other sex within a species.

Examples of Intrasexual Selection

LION'S MANE

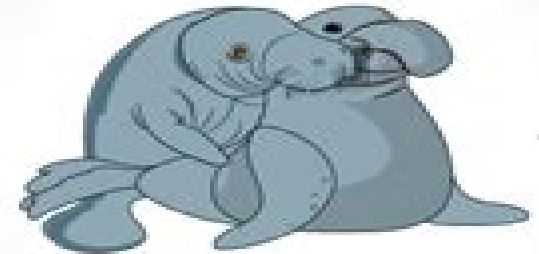

Male lions with impressive manes are more dominant and formidable for selection by females

DEER ANTLERS

Male deer with the largest and most robust antlers mate with females

ELEPHANT SEAL

Male elephant seals engage in fierce physical battles to get access to females

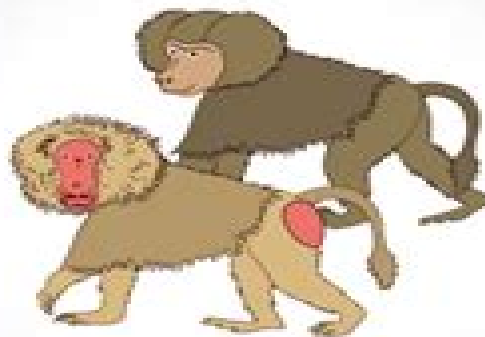

Examples of Intersexual Selection

PEACOCK'S TAIL

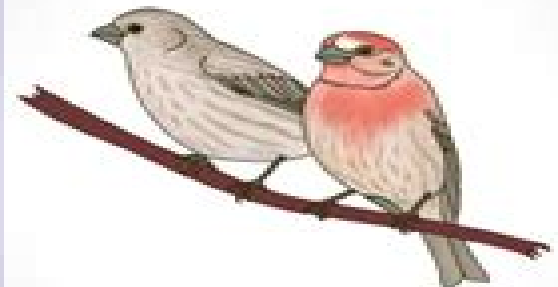

Female peahens favor males with the most dazzling and symmetrical tails

SAVANNA BABOON'S GENITALS

Female baboons exhibit conspicuous genital enlargements to attract males

MATING IN HOUSE FINCH

Female songbirds are attracted to males with the most intricate and captivating songs

Sexual Selection

Sexual Selection:

Sexual Selection in Primates Peter M. Kappeler, Carel P. van Schaik, 2004-05-13 *Sexual Selection in Primates* provides an account of all aspects of sexual selection in primates combining theoretical insights comprehensive reviews of the primate literature and comparative perspectives from relevant work on other mammals birds and humans Topics include sex roles sexual dimorphism in weapons ornaments and armaments sex ratios sex differences in behaviour and development mate choice sexual conflict sex specific life history strategies sperm competition and infanticide The outcome of the evolutionary struggle between the sexes the flexibility of roles and the leverage of females are discussed and emphasised throughout *Sexual Selection in Primates* is aimed at graduates and researchers in primatology animal behaviour evolutionary biology and comparative psychology Male Choice, Female Competition, and Female Ornaments in Sexual Selection Ingo

Schlupp, 2021-05-31 When Charles Darwin first proposed Sexual Selection Theory he suggested two mechanisms competition among males and choice by females Although their importance is long established and extremely well understood their mirror images have remained largely underappreciated males also choose and females also compete The combination of male mate choice MMC and female competition FC may be one of the most overlooked yet important and intriguing phenomena in modern sexual selection theory This novel text reviews our current understanding of MMC and FC highlighting the important connections between them It places both concepts in the context of related fields such as female choice mating systems and sexual selection theory more broadly A truly holistic approach is provided which takes all the relevant elements into consideration especially the relative roles of MMC and FC female ornamentation their evolutionary consequences and their genetic basis Considering male mate choice and female competition in this way as effectively two sides of the same coin creates a powerful paradigm for a more complete understanding of sexual selection *Male Choice Female Competition and Female Ornaments in Sexual Selection* will be suitable for both graduate students and researchers interested in sexual selection from an evolutionary psychological and anthropological perspective It will also appeal to a broader audience of behavioural ecologists and evolutionary psychologists *Sexual Selection and the Origins of Human Mating Systems* Alan F. Dixson, 2009-05-14 This book demonstrates how detailed comparative analyses of the anatomy reproductive physiology and behaviour of non human primates and other mammals can offer profound insights into the origins of human sexual behaviour

Sexual Selection and Reproductive Competition in Insects Murray Blum, 2012-12-02 *Sexual Selection and Reproductive Competition in Insects* explores the biological mechanisms underlying intrasexual reproductive competition as a driving force in sexual selection in insects The book contains papers presented at a symposium on reproductive behavior in insects held at the 15th International Congress of Entomology in Washington D C in 1976 Organized into 13 chapters this volume begins with a historical background on sexual selection theory and some of the principal conceptual advances that have been made since Charles Darwin 1871 posited that a sexual character was a characteristic possessed by only one sex

and not the other. It then introduces the reader to differences in patterns of sexual selection and how they affect the reproductive success of individuals, male-female mating relationships and mate choice by females. The book also discusses the evolution of mating strategies in insects, touching on concepts such as parental investment, female choice and sexual conflict. Later chapters focus on winglessness, fighting and dimorphism in male fig wasps and other insects, along with agonistic behavior among males of *Achias australis*, the function of horns in beetles and the evolution of alternative male reproductive strategies in field crickets. The book also looks into the courtship and mating behavior of insects and then concludes with an analysis of insect life histories in order to elucidate the biological aspects of the male-female phenomenon. This book is an essential reading for biologists and chemists.

Sex, Color, and Mate Choice in Guppies Anne E. Houde, 1997-08-24. This book describes the sexual behavior of guppies and examines how mate choice by females leads to the evolution of the conspicuous colors and the courtship displays for which guppies are widely recognized. The author shows that female guppies prefer males with bright color patterns, especially those with orange spots, and that the mating preferences of females lead to sexual selection on both color patterns and courtship displays of males.

The Descent of Man, and Selection in Relation to Sex Charles Darwin, 1882 **Studies in the Psychology of Sex: Sexual selection in man: I. Touch. II. Smell. III. Hearing. IV. Vision** Havelock Ellis, 1905 **The Descent of Man, and Selection in Relation to Sex ... Second Edition, Revised and Augmented, with Illustrations. Tenth Thousand** Charles Darwin, 1874 Studies in the Psychology of Sex: Sexual selection in man Havelock Ellis, 1914 *The Descent of Man, and Selection in Relation to Sex*, 1871 *Sexual Selection and Animal Genitalia* William G. Eberhard, 1985 **Sexual Selection** James L. Gould, Carol Grant Gould, 1997. A back-to-basics discussion of sex and reproduction that explores what evolutionary advantages there are to sexual reproduction, why species vary so widely in their mating practices, and what larger functions these practices serve. How humans and other animals choose their mates is explored.

The Effects of Sexual Selection on the Mating Behavior of Vervet Monkeys (*Cercopithecus Aethiops*) and Fruit Flies (*Drosophila Melanogaster*) Anne Christine Keddy, 1989 The Descent of Man Charles Darwin, 1874 **Homo-culture, Or, The Improvement of Offspring Through Wiser Generation** Martin Luther Holbrook, 1897 *Alden's Cyclopaedia of Natural History*, 1893 Evolution of the colors of North American land birds Charles Keeler, 1893 **Occasional Papers of the California Academy of Sciences**, 1890

Sexual Selection Malte Andersson, 2019-12-31. Bright colors, enlarged fins, feather plumes, song, horns, antlers, and tusks are often highly sex-dimorphic. Why have males in many animals evolved more conspicuous ornaments, signals, and weapons than females? How can such traits evolve although they may reduce male survival? Such questions prompted Darwin's perhaps most scientifically controversial idea: the theory of sexual selection. It still challenges researchers today as they try to understand how competition for mates can favor the variety of sex-dimorphic traits. Reviewing theoretical and empirical work in this very active field, Malte Andersson, a leading contributor himself, provides a major up-to-date synthesis of sexual

selection The author describes the theory and its recent development examines models methods and empirical tests and identifies many unsolved problems Among the topics discussed are the selection and evolution of mating preferences relations between sexual selection and speciation constraints on sexual selection and sex differences in signals body size and weapons The rapidly growing study of sexual selection in plants is also reviewed This volume will interest students teachers and researchers in behavioral ecology and evolutionary biology Annals & Magazine of Natural History ,1890
