## **Sexual Organization Of The City:**

*The Sexual Organization of the City* Edward O. Laumann, Stephen Ellingson, Jenna Mahay, Anthony Paik, Yoosik Youm, 2005-08-01 We think of the city as a place where anything goes Take the sensational fantasies and lurid antics of single women on *Sex in the City* or young men on *Queer as Folk* and you might imagine the city as some kind of sexual playground a place where you can have any kind of sex you want with whomever you like anytime or anywhere you choose But in *The Sexual Organization of the City* Edward Laumann and company argue that this idea is a myth Drawing on extensive surveys and interviews with Chicago adults they show that the city is to the contrary a place where sexual choices and options are constrained From Wicker Park and Boys Town to the South Side and Pilsen they observe that sexual behavior and partnering are significantly limited by such factors as which neighborhood you live in your ethnicity what your sexual preference might be or the circle of friends to which you belong In other words the social and institutional networks that city dwellers occupy potentially limit their sexual options by making different types of sexual activities relationships or meeting places less accessible To explain this idea of sex in the city the editors of this work develop a theory of sexual marketplaces the places where people look for sexual partners They then use this theory to consider a variety of questions about sexuality Why do sexual partnerships rarely cross racial and ethnic lines even in neighborhoods where relatively few same ethnicity partners are available Why do gay men and lesbians have few public meeting spots in some neighborhoods but a wide variety in others Why are African Americans less likely to marry than whites Does having a lot of friends make you less likely to get a sexually transmitted disease And why do public health campaigns promoting safe sex seem to change the behaviors of some but not others Considering vital questions such as these and shedding new light on the city of Chicago this work will profoundly recast our ideas about human sexual behavior

variety of questions about sexuality Why do sexual partnerships rarely cross racial and ethnic lines even in neighborhoods where relatively few same ethnicity partners are available Why do gay men and lesbians have few public meeting spots in some neighborhoods but a wide variety in others Why are African Americans less likely to marry than whites Does having a lot of friends make you less likely to get a sexually transmitted disease And why do public health campaigns promoting safe sex seem to change the behaviors of some but not others Considering vital questions such as these and shedding new light on the city of Chicago this work will profoundly recast our ideas about human sexual behavior

**Morality Politics in American Cities** Elaine B. Sharp, Yvette M. Alex-Assensoh, 2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study Morality Politics in American Cities is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As provocative as it is informative Morality Politics in American Cities demonstrates that such issues same sex marriage for example are multidimensional and often difficult to resolve Its conclusions however contingent mark an important step in the ongoing process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue

to define American politics      *Women, Business and the Law* World Bank, International Finance Corporation, 2013-01-01  
 Women perform 66% of the world's work produce 50% of the food but earn 10% of the income and own 1% of the property  
 To shed light on why this grim statistic still holds true *Women Business and the Law* aims to examine legal differentiations on the basis of gender in 143 of the world's economies *Women Business and the Law* tracks governments' actions to expand economic opportunities for women across six key areas: accessing institutions, using property, getting a job, providing incentives to work, building credit, and going to court. The report uncovers legal differentiations for women and married versus unmarried women such as being able to register a business, open a bank account, and work at night. These issues are of fundamental importance. When, because of tradition, social taboos, or simple prejudice, half of the world's population is prevented from making its contribution to the life of a nation, the economy will suffer. The empirical evidence does suggest that slowly but surely governments are making progress in expanding opportunities for women. It is our hope that data presented in *Women Business and the Law* will both facilitate research on linkages between legal differentiation and outcomes for women and promote better informed policy choices on what governments can do to expand opportunities for women.
