*Sexuality, Curiosity, Fear, and the Arts* Milton D. Heifetz, 2001 One of the most intriguing questions in the humanities revolves around the basis for our enjoyment of music painting and the other arts This book helps to clarify this issue by exposing the biological components pertinent to the enjoyment of the arts It discusses the anatomy of human emotion and the inherited psychological mechanisms that underlie our reaction to the arts thereby setting a foundation for understanding aesthetics **American Book Publishing Record** ,2002 **Forthcoming Books** Rose Arny, 2001-06 *Subject Guide to Books in Print* ,2001 *Popular Mechanics* ,2000-01 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Los Angeles Magazine** ,2002-09 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian **Queer Beauty** Whitney Davis, 2010-08-26 The pioneering work of Johann Winckelmann 1717 1768 identified a homoerotic appreciation of male beauty in classical Greek sculpture a fascination that had endured in Western art since the Greeks Yet after Winckelmann the value even the possibility of art s queer beauty was often denied Several theorists notably the philosopher Immanuel Kant broke sexual attraction and aesthetic appreciation into separate or dueling domains In turn sexual desire and aesthetic pleasure had to be profoundly rethought by later writers Whitney Davis follows how such innovative thinkers as John Addington Symonds Michel Foucault and Richard Wollheim rejoined these two domains reclaiming earlier insights about the mutual implication of sexuality and aesthetics Addressing texts by Arthur Schopenhauer Charles Darwin Oscar Wilde Vernon Lee and Sigmund Freud among many others Davis criticizes modern approaches such as Kantian idealism Darwinism psychoanalysis and analytic aesthetics for either reducing aesthetics to a question of sexuality or for removing sexuality from the aesthetic field altogether Despite these schematic reductions sexuality always returns to aesthetics and aesthetic considerations always recur in sexuality Davis particularly emphasizes the way in which philosophies of art since the late eighteenth century have responded to nonstandard sexuality especially homoeroticism and how theories of nonstandard sexuality have drawn on aesthetics in significant ways Many imaginative and penetrating critics have wrestled productively though often inconclusively and against themselves with the aesthetic making of sexual life and new forms of art made from reconstituted sexualities Through a critique that confronts history philosophy science psychology and dominant theories of art and sexuality Davis challenges privileged types of sexual and aesthetic creation imagined in modern culture

and assumed today      **Aesthetic Sexuality** Romana Byrne,2013-11-28 To understand why the concept of aesthetic sexuality is important we must consider the influence of the first volume of Foucault's seminal *The History of Sexuality* Arguing against Foucault's assertions that only *scientia sexualis* has operated in modern Western culture while *ars erotica* belongs to Eastern and ancient societies Byrne suggests that modern Western culture has indeed witnessed a form of *ars erotica* encompassed in what she calls aesthetic sexuality To argue for the existence of aesthetic sexuality Byrne examines mainly works of literature to show how within these texts sexual practice and pleasure are constructed as having aesthetic value a quality that marks these experiences as forms of art In aesthetic sexuality value and meaning are located within sexual practice and pleasure rather than in their underlying cause sexuality's *raison d'être* is tied to its aesthetic value at surface level rather than beneath it Aesthetic sexuality Byrne shows is a product of choice a deliberate strategy of self creation as well as a mode of social communication      Evolutionary Aesthetics Eckart Voland,Karl Grammer,2003-06-12 Evolutionary aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty i.e. in art and design that beauty opens up fitness opportunities while ugliness holds fitness risks In this book this adaptive view of aesthetics is developed theoretically presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated      *Bioaesthetics* Carsten Strathausen,2017 In recent years bioaesthetics has used the latest discoveries in evolutionary studies and neuroscience to provide new ways of looking at art and aesthetics Carsten Strathausen's remarkable exploration of this emerging field is the first comprehensive account of its ideas as well as a timely critique of its limitations Strathausen familiarizes readers with the basics of bioaesthetics grounding them in its philosophical underpinnings while articulating its key components Importantly he delves into the longstanding problem of the two cultures that separate the arts and the sciences Seeking to make bioaesthetics a more robust way of thinking Strathausen then critiques it for failing to account for science's historical and cultural assumptions At its worst he says biologism reduces artworks to mere automatons that rubber stamp pre-established scientific truths Written with a sensitive understanding of science's strengths and willing to refute its best arguments Bioaesthetics helps readers separate the sensible from the specious At a time when humanities departments are shrinking and when STEM education is on the rise Bioaesthetics makes vital points about the limitations of science while lodging a robust defense of the importance of the humanities      **The Artful Species** Stephen Davies,2012-11-29 *The Artful Species* explores the idea that our aesthetic responses and art behaviors are connected to our evolved human nature Our humanoid forerunners displayed aesthetic sensibilities hundreds of thousands of years ago and the art standing of prehistoric cave paintings is virtually uncontested In Part One Stephen Davies analyses the key concepts of the aesthetic art and evolution and explores how they might be related He considers a

range of issues including whether animals have aesthetic tastes and whether art is not only universal but cross culturally comprehensible Part Two examines the many aesthetic interests humans take in animals and how these reflect our biological interests and the idea that our environmental and landscape preferences are rooted in the experiences of our distant ancestors In considering the controversial subject of human beauty evolutionary psychologists have traditionally focused on female physical attractiveness in the context of mate selection but Davies presents a broader view which decouples human beauty from mate choice and explains why it goes more with social performance and self presentation Part Three asks if the arts together or singly are biological adaptations incidental byproducts of nonart adaptations or so removed from biology that they rate as purely cultural technologies Davies does not conclusively support any one of the many positions considered here but argues that there are grounds nevertheless for seeing art as part of human nature Art serves as a powerful and complex signal of human fitness and so cannot be incidental to biology Indeed aesthetic responses and art behaviors are the touchstones of our humanity

*The ^AAesthetic Brain* Anjan Chatterjee, MD,2013-10-01 The Aesthetic Brain takes the reader on a wide ranging journey addressing fundamental questions about aesthetics and art Using neuroscience and evolutionary psychology Chatterjee shows how beauty pleasure and art are grounded biologically and offers explanations for why beauty pleasure and art exist at all

**Evolutionary Aesthetics** Eckart Voland,Karl Grammer,2014-01-15 Evolutionary aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty i e in art and design that beauty opens up fitness opportunities while ugliness holds fitness risks In this book this adaptive view of aesthetics is developed theoretically presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated

*Evolutionary and Neurocognitive Approaches to Aesthetics, Creativity, and the Arts* Colin Martindale,Paul Locher,V. M. Petrov,2007 Describes fresh approaches to aesthetics creativity and psychology of the arts approaching these topics from a point of view that is biological or related to biology This book begins with a consideration of ten theories on the evolutionary function of specific arts such as music and literature

**Sexuality, Aesthetics and Morality in "The Picture of Dorian Gray" by Oscar Wilde** Mirja Quix,2018-06-08 Seminar paper from the year 2016 in the subject English Literature Works grade 1 3 University of Cologne Englisches Seminar course Gender and the Sister Arts language English abstract Since The Picture of Dorian Gray by Oscar Wilde was first published in 1890 it can be seen as a representation of the Victorian era a period that lasted uncommonly long from 1837 till 1901 While the length of more than sixty years complicates the exact classification of typical Victorian literary movements certain recurring ideas and literary approaches can be found in its literature Especially the conception of art and aesthetics seemed to experience a time of change reshaping the way in which art was received and the

role of the artist in comparison to the spectator Still as art seemed to be in a state of carination the public reception of new artistic attempts was not always positive Especially the representation of morality and sexuality caused ground for public discontent A connection of morality aesthetics and sexuality in The Picture of Dorian Gray that seems to be of high importance for the novel This paper therefore is going to analyse the novel regarding these aspects and the way they influence each other illuminating whether morality is really depicted as subordinate to an artistic effect or if it is needed in order for the story to advance

**Aesthetic Experience** George Hagman,2005 George Hagman looks anew at psychoanalytic ideas about art and beauty through the lens of current developmental psychology that recognizes the importance of attachment and affiliative motivational systems In dialogue with theorists such as Freud Ehrenzweig Kris Rank Winnicott Kohut and many others Hagman brings the psychoanalytic understanding of aesthetic experience into the 21st century He amends and extends old concepts and offers a wealth of stimulating new ideas regarding the creative process the ideal beauty ugliness and perhaps his most original contribution the sublime Especially welcome is his grounding of aesthetic experience in intersubjectivity and health rather than individualism and pathology His emphasis on form rather than the content of an individual s aesthetic experience is a stimulating new direction for psychoanalytic theory of art With this work Hagman stands in the company of his predecessors with this deeply learned sensitively conceived and provocative general theory of human aesthetic experience Ellen Dissanayake author of Art and Intimacy How the Arts Began and Homo Aestheticus Where Art Comes From and Why

*On Aesthetics in Science* Judith Wechsler,1988
