extraordinary concentrations of biodiversity in the world Its recognition as a zoogeographic region in its own right has
recently been confirmed and all taxa combined the region was found to hold the second most distinct assemblage of
vertebrates in the world after the Australian region despite being the smallest of them all This new field guide in the Helm
Field Guides series covers the whole of the Malagasy region which comprises the unique island of Madagascar and the
various islands and archipelagos of the Indian Ocean including the Seychelles Comoros and Mascarenes Mauritius Reunion
and Rodrigues Every resident and migrant species is covered in full detail with a colour distribution map for each species
Vagrants are also treated in detail but without maps All species are illustrated on a beautiful series of 124 colour plates with
artwork from John Gale and Brian Small Conveniently the plates have been arranged so that all the key species of the various
