

Canadian Law Ch. 3 Note

Chapter 3: Managing Legal Risks

Assessing the Legal Environment:

When a business assesses its legal environment it reduces the likelihood and impact of mistakes that are:

- Costly in terms of the expense of legal services and damage claims
- Distracting in terms of time and effort
- Harmful in terms of relationships and reputation in the industry

This chapter explores how a business can manage its interaction with the law and legal issues. It considers two basic approaches—(1) preventative and (2) reactive.

Preventative approach → evaluation of the risks associated with the business's activities in order to minimize their impact. The emphasis is on the compliance with legal requirements and anticipation of changes in the legal environment.

Reactive approach → recognizes legal problems may still materialize, so the firm needs a strategy in place to deal with such developments.

These 2 approaches are combined in a management plan that reduces the impact of *legal risk* on the organization.

Legal risk → a business risk with legal implications.

Legal Risk Management Plan:

Enterprise risk management → the process of identifying and managing all business risks (i.e. fines, penalties, compliance orders, license suspensions, and liability for payments).

**In smaller organizations, the risk management function may be performed by the chief executive or delegate or even by someone outside the organization, such as an insurance agent or a risk management consultant.

Regardless of where primary responsibility lies, risk management is not a task for any one individual. No single person within an organization has complete knowledge. Risk management involves the cooperation of managers and employees at every level.

- **Step 1:** Identify the legal risks
- **Step 2:** Evaluate the risks
- **Step 3:** Devise a risk management plan
- **Step 4:** Implement the plan
