Smith, 2024-05-28 Shaolin Brew Race Comics and the Evolution of the Superhero looks at how the comic book industry developed from a white perspective and how minority characters were and are viewed through a stereotypical white gaze Further the book explores how voices of color have launched a shift in the industry taking nonwhite characters who were originally viewed through a white lens and situating them outside the framework of whiteness The financial success of Blaxploitation and Kung Fu films in the early 1970s led to major comics publishers creating for the first time Black and Asian superhero characters who headlined their own comics The introduction of Black and Asian main characters who previously only served as guest stars or sidekicks launched a new kind of engagement between comics companies and minority characters and readers However scripted as they were by white writers these characters were mired in stereotypes Author Troy D Smith focuses on Asian Black and Latinx representation in the comic industry and how it has evolved over the years Smith explores topics that include Orientalism whitewashing Black respectability politics the model minority myth and political controversies facing fandoms In particular Smith examines how fans take the superheroes they grew up with such as Luke Cage Black Lightning and Shang Chi and turn them into the characters they wished they had as children Shaolin Brew delves into the efforts of fans of color who urged creators to make these characters more realistic This refining process

increased as more writers and artists of color broke into the industry bringing their own perspectives to the characters. As many of these characters transitioned from page to screen, a new generation of writers, artists, and readers have cooperated to evolve one-dimensional stereotypes into multifaceted dynamic heroes.

Chinatown in a Transnational World Vanessa Künemann, Ruth Mayer, 2012-03-22. This book explores the history, the reality, and the complex fantasy of American and European Chinatowns and traces the patterns of transnational travel and traffic between China, South East Asia, Europe, and the United States, which informed the development of these urban sites. Despite obvious structural or architectural similarities and overlaps, Chinatowns differ markedly depending on their location. European versions of Chinatowns can certainly not be considered mere replications of the American model. Paying close attention to regional specificities and overarching similarities, Chinatowns thus discloses the important European backdrop to a phenomenon commonly associated with North America. It starts from the assumption that the historical and modern Chinatown needs to be seen as complicatedly involved in a web of cultural memory, public and private narratives, ideologies, and political imperatives. Most of the contributors to this volume have multidisciplinary and multilingual backgrounds and are familiar with several different instances of the Chinese diasporic experience. With its triangular approach to the developments between China and the urban Chinese diasporas of North America and Europe, Chinatowns reveals connections and interlinkages which have not been addressed before.
