**Debugging Game History** Henry Lowood, Raiford Guins, 2016-06-03 Essays discuss the terminology etymology and history of key terms offering a foundation for critical historical studies of games Even as the field of game studies has flourished critical historical studies of games have lagged behind other areas of research Histories have generally been fact by fact chronicles fundamental terms of

game design and development technology and play have rarely been examined in the context of their historical etymological and conceptual underpinnings This volume attempts to debug the flawed historiography of video games It offers original essays on key concepts in game studies arranged as in a lexicon from Amusement Arcade to Embodiment and Game Art to Simulation and World Building Written by scholars and practitioners from a variety of disciplines including game development curatorship media archaeology cultural studies and technology studies the essays offer a series of distinctive critical takes on historical topics The majority of essays look at game history from the outside in some take deep dives into the histories of play and simulation to provide context for the development of electronic and digital games others take on such technological components of games as code and audio Not all essays are history or historical etymology there is an analysis of game design and a discussion of intellectual property but they nonetheless raise questions for historians to consider Taken together the essays offer a foundation for the emerging study of game history Contributors Marcelo Aranda Brooke Belisle Caetlin Benson Allott Stephanie Boluk Jennifer deWinter J P Dyson Kate Edwards Mary Flanagan Jacob Gaboury William Gibbons Raiford Guins Erkki Huhtamo Don Ihde Jon Ippolito Katherine Isbister Mikael Jakobsson Steven E Jones Jesper Juul Eric Kaltman Matthew G Kirschenbaum Carly A Kocurek Peter Krapp Patrick LeMieux Henry Lowood Esther MacCallum Stewart Ken S McAllister Nick Monfort David Myers James Newman Jenna Ng Michael Nitsche Laine Nooney Hector Postigo Jas Purewal Rene H Reynolds Judd Ethan Ruggill Marie Laure Ryan Katie Salen Tekinba Anastasia Salter Mark Sample Bobby Schweizer John Sharp Miguel Sicart Rebecca Elisabeth Skinner Melanie Swalwell David Thomas Samuel Tobin Emma Witkowski Mark J P Wolf     Best Before James Newman, 2012-08-21 Despite record sales and an ever growing global industry the simple fact is that videogames are disappearing Most obviously the physical deterioration of discs cartridges consoles and controllers means that the data and devices will crumble to dust and eventually will be lost forever However there is more to the disappearance of videogames than plastic corrosion and bit rot Best Before examines how the videogames industry's retail publishing technology design advertising and marketing practices actively produce obsolescence wearing out and retiring old games to make way for the always new just out of reach coming soon title and next generation platform Set against the context of material deterioration and the discursive production of obsolescence Best Before examines the conceptual and practical challenges faced within the nascent field of game preservation Understanding videogames as rich complex and mutable texts and experiences that are supported and sustained by cultures of gameplay and fandom Best Before considers how and even whether we might preserve and present games for future generations
