Shadows Of A Burning Cross:

Living in the Shadow of the Cross Paul Kivel, 2013-10-01 How our dominant Christian worldview shapes everything from personal behavior to public policy and what to do about it Over the centuries Christianity has accomplished much which is deserving of praise Its institutions have fed the hungry sheltered the homeless and advocated for the poor Christian faith has sustained people through crisis and inspired many to work for social justice Yet although the word Christian connotes the epitome of goodness the actual story is much more complex Over the last two millennia ruling elites have used Christian institutions and values to control those less privileged throughout the world The doctrine of Christianity has been interpreted to justify the killing of millions and its leaders have used their faith to sanction participation in colonialism slavery and genocide In the Western world Christian influence has inspired legislators to continue to limit women's reproductive rights and has kept lesbians and gays on the margins of society As our triple crises of war financial meltdown and environmental destruction intensify it is imperative that we dig beneath the surface of Christianity's benign reputation to examine its contribution to our social problems Living in the Shadow of the Cross reveals the ongoing everyday impact of Christian power and privilege on our beliefs behaviors and public policy and emphasizes the potential for people to come together to resist domination and build and sustain communities of justice and peace Paul Kivel is the award winning author of Uprooting Racism and the director of the Christian Hegemony Project He is a social justice activist and educator who has focused on the issues of violence prevention oppression and social justice for over forty five years

[Under the Shadow of Weimar](#) Louis I. Greenspan, Cyril Levitt, 1993-04-30 Written by authorities on the legal systems of France Britain Germany the United States Israel and Canada this book explores the growing confrontation between democracy and racist incitement The authors consider existing and prospective laws as they trace the efforts to enact and enforce laws that can curb racism in the early stages of its growth without violating democratic freedoms Throughout the book the authors discuss their own legal and political cultures and how the subject countries are

affected by historical encounters with racism Both France and Britain have strong racist political forces and existing laws to combat them Special attention is given to Le Pen whose electoral support has been estimated nationally at more than twenty percent and to the effect Britain's new legislation has had on the country's racist movement The United States represents a case where strong constitutional guarantees against impingement upon freedom of expression have prevented the passage or juridical validation of laws restricting racist incitement Israel finds itself struggling to define a legal remedy that can be used against racist incitement by the Kahane movement Canada now seeking a legal climate that will foster multiculturalism strives to define laws against incitement that will be consistent with its newly established Charter of Freedom And Germany as it faces the enormous problems resulting from unification is forced to reflect upon its own past and the challenges that an active racist movement poses for the country's future Recommended for sociologists political scientists and criminal law specialists
