Burleson,2014-07-11 Howard Phillips Lovecraft 1890 1937 has been described variously as the successor to Edgar Allan Poe a master of the Gothic horror tale and one of the father of modern supernatural fantasy fiction Published originally in pulp magazines his works have grown in popularity since his death so that more than thirty editions are currently in print Yet only recently has Lovecraft received serious attention from literary critics And until now no one has examined his work from a post structuralist perspective Donald Burleson fills that void for the first time in an extended study bringing the resources of deconstruction to bear on the works of this modern gothicist In an introductory overview Burleson gives an unusually readable account of deconstruction theory and terminology a field all too often discussed in densely opaque fashion He goes on to deconstruct thirteen Lovecraft stories delving into their fascinating etymological mazes abundant ambiguities and shifting levels of meanings His lively and remarkably jargon free readings explore Lovecraft s rich figurality to unprecedented depths At the same time Burleson develops the view that in practicing self subversion and structural displacement literary texts perpetuate themselves His final chapter explores the broad themes running through Lovecraft s fiction arguing that these themes in themselves prefigure the deconstructive gesture This insightful and provocative volume will go a long way toward displacing the label of popular writer and establishing Lovecraft as an important figure in American literature      **The popular educator** Popular educator,1872
