*Shakespeare for Everyone* offers an accessible and engaging introduction to the worlds of Shakespeare's plays and sonnets. By focusing on emotions, it enables readers to build the skills and confidence to understand, appreciate, and enjoy Shakespeare's plays by getting up close and personal with the characters in them, with their emotional journeys, and with the dramatic genres of comedy, tragedy, tragicomedy, and history in which they are cast. It provides insights into the forces that shaped Shakespeare's work and includes, in depth, chapters on emotions in four representative plays: love in *A Midsummer Night's Dream*, hate in *Othello*, jealousy in *The Winter's Tale*, and the manipulation of emotions in *Henry V*. The book also considers how emotions were conceptualised in Shakespeare's time and are understood today by modern psychological science. Additionally, the book enables readers to get to know Shakespeare himself and gain insights into the processes of his art. Featuring end-of-chapter further reading sections and an invaluable glossary of key terms through which to unlock the meaning of any Shakespeare play, this practical and informative guide proves that Shakespeare is for everyone. Written in a conversational tone, this short yet compelling book is not just a series of insights into what Shakespeare's plays mean, but a way of exploring what it is to be human.

**Faultlines** Alan Sinfield, 1992. Through agile and often provocative discussions of texts by Shakespeare, Sidney, Donne, and Marlowe, the scope of dissidence and control is reassessed in relation to the state, gender, and sexualities, religion, and cultural production. Sinfield provides a hard-hitting critique of the role of Shakespeare in contemporary culture and argues for new readings of our national poet.

**The Play of Conscience in Shakespeare's England** Jade Standing, 2023-12-29. Having a conscience distinguishes humans from the most advanced AI systems. Acting in good conscience, consulting one's conscience, and being conscience-wracked are all aspects of human intelligence that involve reckoning, deriving general laws from particular inputs, and vice versa, and judgement, contemplating the relationship of the reckoning system to the world. While AI developers have mastered reckoning, they are still working towards the creation of judgement. This book sheds light on the reckoning and judgement of conscience by demonstrating how these concepts are explored in *Everyman*, *Doctor Faustus*, *The Merchant of Venice*, and *Hamlet*. Academic student or general interest readers discover the complexity and multiplicity of the early modern concept of conscience, which is informed by the scholastic intellectual tradition, juridical procedures of the court of Chancery, the practical advice of Protestant casuistry, and Reformation theology. The aims are to examine the rubrics for thinking through, regulating, and judging actions that define the various consciences of Shakespeare's day, to use these rubrics to interpret questions of truth and action in early modern plays, and to offer insights into what it is about conscience that developers want to grasp to eliminate the difference between
