tutoring program in special education classrooms depends on teachers recruiting dedicated and dependable students who have positive attitudes and the desire to help others. Once peer tutors are selected, teachers must then provide training, monitor progress, manage schedules, address challenges, and evaluate the peer tutors' efforts. This guide, together with the Peer Tutor Student Handbook, purchased separately, are designed to help teachers develop and maintain a successful and mutually rewarding peer tutor program. I had the pleasure of observing the Peer Tutoring program developed by Dr. Styer and Suzanne Fitzgerald. This is an amazing program that promotes awareness of individuals with disabilities as well as provides peers the skills needed to support and develop friendships. The way this program is structured allows for these skills to generalize across the school environment and models friendships and the acceptance of others. Dr. Nicole Bain, Psychologist and Autism Expert, Together, Candice and Suzanne have over 40 years of teaching experience in special education and have developed peer tutor programs in every classroom they've worked in. Their peer tutoring model of reverse inclusion maximizes peer interaction in natural and appropriate ways. They were inspired to share their experiences recruiting and training peer tutors, knowing the positive effects that these programs have on both special education students and the general education students who work as peer tutors. I became a peer tutor because I want to be a special education teacher when I grow up. My favorite part of the job was getting to know the kids. Having this experience made me grow as a person. Chrissy Peer Tutor. This manual contains a teacher's copy of the Peer Tutor Student Handbook, a companion book available for purchase for each peer tutor. The Teacher's Guide to Peer Tutoring belongs to Styer Fitzgerald Publishing's line of outstanding educational products, including the Styer Fitzgerald Program for Functional Academics. Originally published in 1994, without sufficient skill in reading, secondary education is virtually impossible. Yet many pupils reach this point with reading skills far below those which would enable them to benefit from the texts put before them. This book gives teachers of 9 to 14 year olds a readily accessible and simple account of how peer tutoring can be organised to elevate the reading performance of low achieving readers. The book outlines the various options available to teachers, including relaxed or shared reading with a partner, paired reading, using reading together and reading alone techniques, and the more rigorous pause, prompt and praise techniques for those pupils needing more sustained and systematic support.
