Sexism And Reentry Job Realities For Women Librarians:

Sexism and Reentry Katherine Murphy Dickson, 1997-06-05 This book analyzes how two social forces upheaval in the economy and the emergence of the women's movement acted together to provide a cultural context in which re-entry into the work force became a significant stage in the work process for many women and drastically altered women's work and family roles. Re-entry into the work force emerged as a new pattern of labor force participation for women in the 1950s and has continued as a significant pattern into the 1980s. It provides a detailed account and statistical analysis of the results of Dickson's 1983 survey of women librarians who tried to re-enter librarianship from 1965 to 1983. The survey sought to explore in detail 1 the characteristics of job seeking re-entry librarians 1965-1983 2 reasons for seeking re-entry 3 the process of job finding 4 what factors contributed to employment success or failure 5 the extent to which there were continuities and changes in the re-entry situation during the period 1965 through 1983 and 6 the extent to which the two classes selected for study the classes of 1962 and 1972 were similar or different in re-entry efforts success or failure. Among the most significant findings were that 16 percent of the survey population attempted re-entry and of those only 67 percent were successful and that even those who were successful experienced many difficulties. **Gender Codes** Thomas J.

Misa, 2011-09-14 The computing profession faces a serious gender crisis. Today fewer women enter computing than anytime in the past 25 years. This book provides an unprecedented look at the history of women and men in computing, detailing how the computing profession emerged and matured and how the field became male-coded. Women's experiences working in offices, education, libraries, programming, and government are examined for clues on how and where women succeeded and where they struggled. It also provides a unique international dimension with studies examining the U.S., Great Britain, Germany, Norway, and Greece. Scholars in history, gender, women's studies, and science and technology studies, as well as department chairs and hiring directors, will find this volume illuminating. On Account of Sex Betsy Kruger, Catherine A. Larson, 2000 Identifies and describes published materials on the status of women in the profession. Years covered in this work were a particularly rich time for writings relevant to the status of women in librarianship and information science. In addition to a large body of journal literature, these years also witnessed the publication of several significant books. **Library and Information Science Annual. Volume 7** Bohdan S. New Zealand Stories Katherine Murphy Dickson, 1998-04-16 Comprising only a small segment of renowned short story writer Katherine Mansfield's work, the New Zealand stories were written within a five-year span between 1918 and 1922. However, they were never published as a group until 1974 and have rarely been the focus of sustained analysis. Katherine Dickson's study, a close textual analysis, reveals these stories as proto-postcolonial narrative which reward close scrutiny by the serious scholar. **Library Acquisitions List** Martin P.
