Sexual Revolutions Gender And Labor At The Dawn Of Agriculture:

Sexual Revolutions Jane Peterson, 2002-09-18 The change from a hunting gathering lifestyle to one dependent upon farming constitutes a truly revolutionary event in the human career Most archaeologists agree that how ancient people organized their work and family groups was crucial to the success of early attempts at farming Yet little serious attention has been paid to the social organization of labor in the prehistoric past This book addresses that lacuna by investigating sexual divisions of labor As a case study Peterson chose the southern Levant of West Asia where the world's first farming societies emerged some 10 000 years ago Shattering long held assumptions about women's work that lead to generalizations about gender roles Peterson shows that gender studies can be both scientific and thoroughly grounded in feminist theory

Gender Trouble and Current Archaeological

Debates Uroš Matić, Bisserka Gaydarska, Laura Coltofean, Marta Díaz-Guardamino, 2024-10-28 This volume challenges the status quo by addressing a selection of intensely discussed themes in contemporary archaeological practice from a gender perspective. It aims to demonstrate that gender is intrinsic to archaeology and that gender archaeology can enrich our studies irrespective of the discipline's possible future directions and so-called paradigm shifts. The scholarly contributions commissioned for this volume critically discuss and reflect on a wide range of concepts, ideas, principles, and theories presently applied in archaeology within the framework of gender. The chapters included in the first part deal with themes in world archaeology that have little or no focus on gender, such as the Third Science Revolution, e.g. ancient DNA, stable isotopes, analyses, big data, posthumanism, e.g. new materialism, symmetrical archaeology, and the ontological turn, and digital archaeology and heritage. The second part focuses on themes in which gender archaeology has made serious advances: intersectionality, social inequality, violence, mobility. The third part deals with themes crucial for contemporary archaeology and society, namely gender education, gender representation in museum exhibitions, and the future of gender archaeology. The volume concludes with a coda chapter that critically assesses the preceding contributions and the volume as a whole. The book offers a gender-balanced and inclusive authorship consisting of both well-established and early-career researchers closely connected to the EAA whose professionally, culturally, and geographically diverse backgrounds and experiences enrich the viewpoints discussed in the chapters. The targeted audience is archaeologists from all theoretical and scientific backgrounds at all stages of their career. Chapter 2, Sex, Gender, and the Third Science Revolution, is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. First reference work to explore the research on gender in archaeology. **ARCHAEOLOGY AND WOMEN** Sue Hamilton, Ruth D. Whitehouse, Katherine I. Wright, 2007-05-15 Archaeology and Women draws together from a variety of angles work currently being done within a contemporary framework on women in archaeology. One section of this collection of original articles addresses the historical and contemporary roles of women in the discipline. Another attempts to link contemporary archaeological theory and practice to work on women and gender in other fields. Finally, this volume presents a wide diversity of theoretical approaches and methods of study of women in the ancient world, representing a cross-section of work being carried out today under the broad banner of gender archaeology. The geographical and chronological range of the contributions is also wide, from Southeast Asia and South America to Western Asia, Egypt, and Europe, from Great Britain to Greece, and from 10,000 years ago to the recent past. An ideal sampler for courses dealing with women and archaeology.
