The Sexual Alarm System Judith Leavitt, 2012-06-07 *The Sexual Alarm System* Women's Unwanted Response to Sexual Intimacy and How to Overcome It by Judith Leavitt explores the shield that develops around many women's bodies to protect them from real and perceived sexual intrusions and dangers From a young age women are socialized to regard their sexuality as something that puts them in danger However the Sexual Alarm System interferes with a woman's ability to be sexual when she wants to be Leavitt discusses how the Alarm functions how it develops what triggers it and how it interferes with a woman's ability to be sexual in an intimate partnership In addition this book presents specific body exercises for therapists to give to women to work through this Alarm and to develop the ability to enjoy their sexuality *When Face Recognition Goes Wrong* Catriona Havard, 2024-10-29 *When Face Recognition Goes Wrong* explores the myriad ways that humans and machines make mistakes in facial recognition Adopting a critical stance throughout the book explores why and how humans and machines make mistakes covering topics including racial and gender biases neuropsychological disorders and widespread algorithm problems The book features personal anecdotes alongside real world examples to showcase the often life changing consequences of facial recognition going wrong These range from problems with everyday social interactions through to eyewitness identification leading to miscarriages of justice and border control passport verification Concluding with a look to the future of facial recognition the author asks the world's leading experts what are the big questions that still need to be answered and can we train humans and machines to be super recognisers This book is a must read for anyone interested in facial recognition or in psychology criminal justice and law *Attraction Explained* Viren Swami, 2015-12-22 How much does appearance matter in the formation of romantic relationships Do nice guys always finish last Does playing hard to get ever work What really makes for a good chat up line When it comes to relationships there's no shortage of advice from self help experts pick up artists and glossy magazines But modern day myths of attraction often have no basis in fact or worse are rooted in little more than misogyny In *Attraction Explained* psychologist Viren Swami debunks these myths and draws on cutting edge research to provide a ground breaking and evidence based account of relationship formation At the core of this book is a very simple idea there are no laws of attraction no foolproof methods or strategies for getting someone to date you But this isn't to say that there's nothing to be gained from studying attraction Based on science rather than self help cliches *Attraction Explained* looks at how factors such as geography appearance personality and similarity affect who we fall for and why *Primate Sexuality* Alan F. Dixson, 2012-01-26 *Primate Sexuality* provides a synthesis of current research on the evolution and physiological control of sexual behaviour in the primates prosimians monkeys apes and human beings This new edition has been updated and greatly expanded throughout to incorporate a decade of new research findings *The Oxford Handbook of Social Cognition* Donal E. Variability and Individual Differences in Early Social Perception and Social Cognition Jessica Sommerville, Alia Martin, Talee Ziv, 2016-06-10 Over the past three decades mounting evidence has suggested that infants social perceptual and social cognitive abilities are considerably richer than was once thought By the end of the second year of life infants discriminate faces along various social dimensions attend to and understand others goals and intentions use the emotions of others to guide their learning and behavior attribute dispositional characteristics to other agents and make basic social evaluations What has also become clear is that there is a great deal of variability in infants social perception and cognition A critical outstanding question concerns the nature and meaning of such variability The proposed Research Topic welcomes papers addressing cutting edge questions regarding variability and individual differences in early social perception and social cognition The goal of these papers is to investigate overarching questions in this domain which are necessary to move the field forward Variability in early social perception and social cognition among other domains in infancy and early childhood is often attributed to noise or overlooked in favor of focusing on age related changes Yet recent work suggests that variability in social perceptual and social cognitive tasks reliably inter relates and predicts real world social behaviors For example infants everyday experience with different face categories predicts individual differences in face processing infants production of goal directed actions predicts their simultaneous understanding of these actions and variability in social attention during the second year of life is related to theory of mind during the preschool years These findings suggest that variability in performance on social perception and social cognition tasks is not merely a nuisance variable but rather may provide the key to addressing significant questions regarding the nature of infants social perception and social cognition and the processes that underlie developmental change Acknowledging and closely examining and investigating variability in early social perceptual and social cognitive abilities may represent a powerful approach for understanding development in at least two ways First variability can signal

transitional points in the developmental onset of a given ability Thus such variability and the extent to which variability relates to experience and or other abilities can be used to test hypotheses regarding mechanisms that underlie developmental changes Second variability can represent more enduring individual differences between infants In this case critical questions arise regarding the source of individual differences that is what factors shape the emergence of individual differences and whether such early individual differences contribute to the development of more advanced and sophisticated forms of social cognition and behavior The goal of this Research Topic will be to encourage researchers to take variability in early social perception and cognition seriously Papers that give variability center stage and are aimed at addressing the value of variability for identifying developmental mechanisms as well as investigating the existence source and antecedents of early individual differences in social perception and social cognition are welcomed Taken together the contributed papers will provide integral new information to the study of social perception and social cognition over the first three years of life

Facial Attractiveness Leslie Zebrowitz, 2001-10-30 Using evolutionary cognitive and social psychology this volume examines the issues raised by the question What makes some faces more attractive than others The authors challenge the views that beauty is simply in the eye of the beholder that it is idiosyncratic and that it is nothing more than an artifact of culture They argue instead that there are a variety of biological social motivational and developmental issues involved in facial attractiveness By exploring attractiveness and preference from these various perspectives this collection offers profound and unique insight on how and why we are attracted to certain facial types and how that attraction can influence our social interaction Some of the ideas presented in *Facial Attractiveness* are surprising others controversial and others even paradoxical Combined however they offer a new perspective on age old questions of attraction beauty and preference Each author challenges standard assumptions about beauty and encourages the reader to explore new trends in evolutionary social and cognitive psychology in search of a more coherent answer to the questions of what makes a face attractive and why

Social Interaction in Neuropsychiatry Leonhard Schilbach, Danilo Bzdok, Victoria Leong, Elizabeth Redcay, Frieder Michel Paulus, Kevin A. Pelphrey, 2021-06-30 *Human Sexuality* Simon LeVay, Sharon McBride Valente, 2006 This textbook introduces students to the diversity of human sexual expression and the diversity of perspectives from which sexuality can be viewed from biology and medicine evolutionary theory to cognitive science and social psychology The authors encourage critical thinking and enable students to contribute constructively and non judgmentally to the social debate on sexual issues The second edition presents new coverage on gay marriage sex education minority issues recent brain imaging studies advances in contraceptive technology and STD treatment and sexual arousal disorders The text is also more accessible with reorganized chapters on women s and men s bodies and enhanced pedagogy *The Descent of Man, and Selection in Relation to Sex* Charles Darwin, 1882 *Lloyd's Encyclopaedic Dictionary* , 1895 **The Child Sexual Abuse Case in the Courtroom** James Selkin, Peter G. W. Schouten, 1987 Universal Dictionary of the English Language , 1898 *Sex in*

Education Edward Hammond Clarke, 1874 **Faces in the Crowd** David Riesman, 1952 An eleven year old boy describes the joys and sorrows of growing up in a dysfunctional family with a jobless alcoholic father during the hard times of the Depression **The Effects of Symmetrical Decorations on the Attractiveness of Faces and Abstract Designs** Rodrigo Andrés Cárdenas, 2005 *Sexual Science, Including Manhood, Womanhood, and Their Mutual Interrelations* Orson Squire Fowler, 1870 The Etiology of Osseous Deformities of the Head, Face, Jaws and Teeth Eugene Solomon Talbot, 1894
