Active Learning Through Drama, Podcasting, and Puppetry Kristin Fontichiaro, 2007-03-30 Contrary to the trend to do away with arts education as an unnecessary expense in schools trying to boost student test scores this book promotes and explains the value of integrated arts instruction in furthering the accomplishment of curricular objectives and fostering student achievement Accomplished library media specialist and arts instructor Kristin Fontichiaro discusses how drama shadow puppetry and podcasting can be used as tools to meet curriculum objectives in the K 8 media center By concentrating on the process of creating a piece of drama or puppetry or a podcast as opposed to the goal of performance and by infusing the arts with curriculum objectives in story or research these techniques can intensify a child's learning and provide context for classroom curriculum objectives A discussion of the affective and academic benefits of this process based work as well as sample lessons are included Photographs and examples of student work illustrate the techniques Grades K 8

Light as Experience and Imagination from Paleolithic to Roman Times David S. Herrstrom, 2017-09-26 This book is an interdisciplinary synthesis and interpretation about the experience of light as revealed in a wide range of art and literature from Paleolithic to Roman times Humanistic in spirit and in its handling of facts it marshals a substantial body of scholarship to develop an explication of light as a central even dramatic reality of human existence and experience in diverse cultural settings David S Herrstrom underscores our intimacy with light not only its constant presence in our life but its insinuating character Focusing on our encounters with light and ways of making sense of these this book is concerned with the personal and cultural impact of light exploring our resistance to and acceptance of light Its approach is unique The book's true subject is the individual's relationship with light rather than the investigation of light's essential nature It tells the story of light seducing individuals down through the ages Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions to it as reflected in art Paleolithic through Roman architecture Egyptian Grecian Roman mythology and religion Paleolithic Egyptian and literature e.g. Akhenaten Plato Aeschylus Lucretius John the Evangelist Plotinus and Augustine This book celebrates the complexity of our relation to light's character No individual experience of light is truer than any other none improves on any previous experience of light's tidal pull on us And the wondrous variety of these encounters has yielded a richly layered tapestry of human experience By its broad scope and interdisciplinary approach this pioneering book is without precedent
