technology held in Varenna Italy in July 2013 The aim of the school was to offer a glimpse of the many questions that remain unanswered about this molecule and topics covered included water in relation to other liquids biological water local environment of water protons atmospheric water amorphous solid phases of water NMR studies of water spectroscopic studies of water the structure of liquid water and supercooled water among others While this list is by no means exhaustive or complete it is wide enough to provide a solid basis to young researchers in the field and the book will be a valuable source of reference for students and all those with an interest in the properties of this fascinating substance
