**the Field** William Jevning,2010-02-21 From the most ancient time of human existence stories of strange man animals have been passed down in legends and myth These stories have been told in all parts of the world and are remarkably similar How could such stories be created and why Could the collective unconscious memory of humanity hold within it lurking shadows of creatures we once knew Creatures that today exist only as legend and myth could there be more is there more Fossil records firmly establish that once there did exist a giant ape like creature called Gigantopithecus Scientists have determined that this ape like creature was between 10 and 12 feet in height and weighed approximately 1 200 pounds This creature actually did exist but no one really knows much more about about it other than its weight and height and no one knows anything about its behavioral characteristics Could it have been the ancestor to the sasquatch of today no one really knows nor does it matter The simple fact that such creatures did exist at one time makes the possibility of ape like giants existing today real Notes From the Field Tracking North America s sasquatch is a study into this issue it covers ancient descriptions from different parts of the world and tracks this creature to modern times and discusses recent field discoveries      [National](#)
