Producing Reproductive Rights Udi Sommer, Aliza Forman-Rabinovici, 2019-08-15 Offers a unique analysis of abortion policy worldwide focusing on effects of civil society national governments and intergovernmental organizations Research on Reproductive Health at WHO Special Programme of Research, Development, and Research Training in Human Reproduction (World Health Organization), 2004-06-23 Tackling the consequences associated with reproductive health problems is a priority in developing countries in particular with its impact on social and economic development The UNDP UNFPA WHO World Bank Special Programme of Research Training in Human Reproduction HRP seeks to do this by supporting basic clinical epidemiological social science and operations research and conducting systematic reviews This report presents an overview of the HRP s work over the biennium 2002 2003 Divided into six chapters each focusing on a different aspect of reproductive health such as family planning making pregnancy safer reproductive tract infections preventing unsafe abortion adolescent sexual and reproductive health and co operating with countries the report makes a case for more substantial funding to further the work of the programme

Safe Abortion Rebecca J. Cook, 2007 In 2003 the World Health Organization published its well reference handbook Safe Abortion Technical and Policy Guidance for Health Systems to address the estimated almost 20 million induced abortions each year that are unsafe imposing a burden of about 67 thousand deaths annually It is a global injustice that 95 percent of unsafe abortions occur in developing countries The focus of guidance is on abortion procedures

that are lawful within the countries in which they occur noting that in almost all countries the law permits abortion to save a woman's life. The guidance treats unsafe abortion as a public health challenge and responds to the problem through strategies concerning improved clinical care for women undergoing procedures and the appropriate placement of necessary services. Legal and policy considerations are explored and annexes present guidance to further reading. International consensus documents on safe abortion and on manual vacuum aspiration and post-abortion contraception.

Law and Global Health Michael Freeman, Sarah Hawkes, Belinda Bennett, 2014-05-29. Current Legal Issues like its sister volume Current Legal Problems now available in journal format is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline, and analyses points of controversy in the use and abuse of extra-legal arguments within legal theory and practice. Law and Global Health, the sixteenth volume in the Current Legal Issues series, offers an insight into the scholarship examining the relationship between global health and the law. Covering a wide range of areas from all over the world, articles in the volume look at areas of human rights, vulnerable populations, ethical issues, legal responses, and governance.

Contemporary Obstetrics and Gynecology for Developing Countries Friday Okonofua, Joseph A. Balogun, Kunle Odunsi, Victor N. Chilaka, 2021-08-05. This book is a comprehensive and easy-to-read guide to obstetrics and gynecology in developing countries. Although significant progress has been made towards the reduction of maternal mortality and morbidity globally, they are still unacceptably high in developing countries. This can be directly or indirectly tied to poor quality maternal health care and lack of access to cost-effective comprehensive healthcare. Health practitioners in developing countries also contend with trying to keep abreast of recent developments in obstetrics and gynecology while dealing with lack of time, resources, and access to relevant information. This textbook was thus created by experts in obstetrics and gynecology with extensive experience in African clinical settings and consultants in developed countries to teach proper and accurate diagnosis, treatment, and management of gynecologic and obstetric health issues within the context of developing countries. This second edition has been fully updated throughout with an added 25 chapters that cover topics such as reproductive health, gynecological cancers, and research methods. The book is divided into six sections: Women's Reproductive Health, Obstetrics, Medical and Surgical Disorders in Pregnancy, General Gynecology, Gynecological Malignancies, Health Systems Organization, Research Methodology, and Biostatistics. These section topics have been carefully covered by expert authors with the use of valid scientific data, policy instruments, and adapted to the cultural and social context of developing countries, with particular in-depth coverage of conditions that have greater prevalence and incidence in developing countries. Each chapter also focuses on filling gaps in knowledge with a distinct pedagogical approach, starting with a set of learning objectives and ending with key takeaways for the chapter. This is an ideal guide for residents, medical students, practitioners,

of obstetrics and gynecology midwives general practitioners and pediatricians particularly those working in developing countries **Life and Learning XVI** University Faculty for Life.
