**New Ideas in Performance Science** Vassilis Sevdalis, Niels Chr. Hansen, Valentin Bégel, 2024-11-11 The discoveries made by scientists over the last years have contributed to exceptional advancements within the fast growing field of Performance Science. As an interdisciplinary research field, Performance Science has the potential to bring together practitioners, scientists, and scientific methodologies from diverse research fields including psychology, performing arts, sport science, human movement science, education, business, and management. Across domains, Performance Science can provide insights into fundamental skills, psychological and physiological mechanisms, and outcomes of performance activities and experiences. In turn, scientific advances in Performance Science foster the development of innovative interventions tailored for key aspects of education, training, health, and well-being.

**Challenges in Detection Approaches for Forensic Science** Lynn Dennany, 2021-04-13 Forensic science combines analytical science with the requirements of law enforcement agencies and legislation. This can often pose challenges within the development of novel analytical methods, particularly with the drive to have more in-field and in-situ applications to facilitate the investigation of criminal cases. This book will explore the specific challenges encountered by forensic scientists and the developments that are being made to address these within the framework of the legislative requirements. It will provide a critical appraisal of the current challenges facing analytical approaches for the detection of forensic evidence and the state-of-the-art technologies used to address these challenges. Providing an excellent combination of current research and how this pertains to forensic investigations, the book will also highlight key obstacles within this ever-changing environment. Aimed at graduates and forensic professionals, this is a unique oversight of the current work being undertaken within the development of analytical methods and also in the interpretation of complex crime scene samples.
