Sivakumar Alagumalai,Stephanie Burley,John P. Keeves,2013-09-03 Teachers empower both the next generation of learners

and educators Communities value the intricate roles and responsibilities of teachers many of whom who go beyond the

tangibles to cater to the learning needs of their students The multidimensional and multifaceted relationship between

teacher education providers and teachers is a complex one At one end of the spectrum sits the scholarship of teaching while

at the enacted zone sits standards based praxis Teacher education and scholarship of teaching provides the avenue to

demonstrate this interaction of knowledge pedagogy research and broadly scholarship Unfortunately there is no strong

consensus about the value of pedagogical preparation for teachers This monograph highlights the broad focus on how

education draws its knowledge base from various disciplines advancing that education itself can become a plethora for

shared discourse and reflection The chapters provide fresh demonstrated understanding into practice enabled research

directions and emphasise the position of research based praxis in both schools and in institutions entrusted with teacher

education Importantly the monograph demonstrates the two way communication between the community and teacher

educators about knowledge experiences values and diversity and to add value with the sole aim to enhance learning It

highlights education is a collective endeavour in that education and teacher education are subsets of the community and

deliberations in communities add important synergy to education s evolution and revolution Thus the process of inquiry is

fundamental in education and implies transcending traditional discipline bound knowledge and processes This monograph

provides the challenge to educators that no single or specific discipline directs educational development and enrichment nor
