**Fixed** John Y. Campbell, Tarun Ramadorai, 2025-10-21 Two leading economists reveal why today's personal finance markets are rigged against us and offer practical steps to fix them We interact with the financial system every day whether taking out or paying off loans making insurance claims or simply depositing money into our bank accounts Fixed exposes how this system has been corrupted to serve the interests of financial services providers and their cleverest customers at the expense of ordinary people John Campbell and Tarun Ramadorai diagnose the ills of today's personal finance markets in the United States and across the globe looking at everything from short term saving and borrowing to loans for education and housing financial products for retirement and insurance They show how the system is fixed to benefit those who are wealthy and more educated while encouraging financial mistakes by those who are not making it difficult for regular consumers to make sound financial decisions and disadvantaging them in some of the most consequential economic transactions of their lives Campbell and Ramadorai describe how some even opt out of the financial system altogether relying on unregulated and often shady mechanisms to implement necessary financial functions with dire consequences for individuals families and the economy more broadly With the explosive growth of the global middle class longer lifespans and greater numbers of seniors managing their money alone the pitfalls of personal finance now affect billions of people around the world Fixed proposes concrete solutions that harnesses the expertise of economists the power of government and the speed of technology to restore fairness and trust in our broken system and make it work better for ordinary people      *Your Student Loan* California Student Aid Commission, 1993      [Mindmasters](#) Sandra Matz, 2025-01-07 A fascinating exploration of how algorithms penetrate the most intimate aspects of our psychology from the pioneering expert on psychological targeting There are more pieces of digital data than there are stars in the universe This data helps us monitor our planet decipher our genetic code and take a deep dive into our psychology As algorithms become increasingly adept at accessing the human mind they also become more and more powerful at controlling it enticing us to buy a certain product or vote for a certain political candidate Some of us say this technological trend is no big deal Others consider it one of the greatest threats to humanity But what if the truth is more nuanced and mind bending than that In Mindmasters Columbia Business School professor Sandra Matz reveals in fascinating detail how big data offers insights into the most intimate aspects of our psyches and how these insights empower an external influence over the choices we make This can be creepy manipulative and downright harmful with scandals like that of British consulting firm Cambridge Analytica being merely the tip of the iceberg Yet big data also holds enormous potential to help us live healthier happier lives for example by improving our mental health encouraging better financial decisions or enabling us to break out of our echo chambers With passion and clear eyed precision Matz shows us how to manage psychological targeting and redesign the data game Mindmasters is a riveting look at what our digital
