Viral Challenge Compare Same Day Delivery:

What is Really "On-Time"? A Comparison of Due Date Performance Indicators in Production Ricarda Schäfer, 2017-07-10
Bachelor Thesis from the year 2016 in the subject Business economics Supply Production Logistics grade 1.0 Jacobs University Bremen gGmbH Production Logistics Networks language English abstract On time delivery is essential in today's dynamic conditions if a company cannot produce and deliver on time it has to make up for it by using high cost express delivery or faces customer dissatisfaction One factor influencing the delivery reliability is the due date performance DDP within production Although the significance of DDP has been established the question of how to measure it remains A review of existing literature shows the vast amount of different DDP measures lateness relative lateness tardiness schedule reliability etc The purpose of this paper is to compare different DDP measures used in manufacturing in order to assess their interrelationship so that companies are better able to understand the impact of their choice of measure A review of DDP measures described in literature is performed followed by statistical analysis of the relations between those measures computed on production feedback data from four real world manufacturers The results indicate that there exist differences across DDP measure groups Further research is needed to assess the benefits of each measure in a given situation
