Micromobility Selim Dünder, 2025-01-20 This book provides a comprehensive overview on micromobility which is a mode of transportation that has become particularly popular among young people in recent years due to the impact of the COVID 19 pandemic and supports public transport for short distances It includes contributions by an interdisciplinary pool of authors from civil engineering urban and regional planning law social sciences physiotherapy and rehabilitation It demonstrates that micromobility is a developing mode of transportation and represents a service that needs to be integrated into the transportation system The book addresses micromobility from various perspectives making it a reference tool for researchers transportation planners operators decision makers and policy makers A special focus is put on the effects of micromobility on health the business models and the legal status of micromobility systems reflecting perspectives from both health sciences and social sciences Patent Landscape Report - Hydrogen fuel cells in transportation World Intellectual Property Organization, 2022 Over the next decade transforming the transportation sector to put it on a Net Zero pathway will require a combination of technological innovation government and corporate decision making and adapted customer behavior Reducing greenhouse gas emissions by transportation a sector responsible for almost 24 percent of direct carbon dioxide emissions from fuel combustion is crucial This WIPO Patent Landscape Report provides early observations on patenting activity together with complementary information from online news press releases and corporate financial reporting in the field of hydrogen fuel cells in transportation *Electrifying Mobility* Graham Parkhurst, William Clayton, 2022-10-17 Electrifying Mobility Realising a Sustainable Future for the Car considers the drivers barriers to adoption and the current lived experience of electric vehicles drawing upon this experience to inform planning for mass adoption and how regulation might change to reflect the specific needs and challenges raised **Choose Wisely** Barry Schwartz, Richard Schuldenfrei, 2025-09-23 A leading psychologist and philosopher challenge the shortcomings of rational choice theory and propose a new framework for understanding decision making For many decision scientists their starting point drawn from economics is a quantitative formula called rational choice theory allowing people to calculate and choose the best options The problem is that this framework assumes an overly simplistic picture of the world in which different types of values can be quantified and compared leading to the most rational choice Behavioral economics acknowledges that irrationality is common but still accepts the underlying belief from economics of what a rational decision should look like In this book Barry Schwartz and Richard Schuldenfrei offer a different way to think about the choices we make every day Drawing from economics psychology and philosophy and both inspired by and challenging Daniel Kahneman's *Thinking Fast and Slow* they show how the focus on rationality narrowly understood fails to fully describe how we think about our decisions much less help us make better ones Notably it overlooks the positive contribution that framing how we determine what aspects are most important to us contributes to good decisions Schwartz and Schuldenfrei argue that our choices should be informed by our individual

constellation of virtues allowing for a far richer understanding of the decisions we make and helping us to live more integrated and purposeful lives
