Healy, 1999-07-13 In this comprehensive practical and unsettling look at computers in children s lives Jane M Healy Ph D questions whether computers are really helping or harming children s development Once a bedazzled enthusiast of educational computing but now a troubled skeptic Dr Healy examines the advantages and drawbacks of computer use for kids at home and school exploring its effects on children s health creativity brain development and social and emotional growth Today the Federal Government allocates scarce educational funding to wire every classroom to the Internet software companies churn out educational computer programs even for preschoolers and school administrators cut funding and space for books the arts and physical education to make room for new computer hardware It is past the time to address these issues Many parents and even some educators have been sold on the idea that computer literacy is as important as reading and math Those who haven t hopped on the techno bandwagon are left wondering whether they are shortchanging their children s education or their students futures Few people stop to consider that computers used incorrectly may do far more harm than good New technologies can be valuable educational tools when used in age appropriate ways by properly trained teachers But too often schools budget insufficiently for teacher training and technical support Likewise studies suggest that few parents know how to properly assist children s computer learning much computer time at home may be wasted time drawing children away from other developmentally important activities such as reading hobbies or creative play Moreover Dr Healy finds that much so called learning software is more edutainment than educational teaching students more about impulsively pointing and clicking for some trivial goal than about how to think to communicate to imagine or to solve problems Some software used without careful supervision may also have the potential to interrupt a child s internal motivation to learn Failure to Connect is the first book to link children s technology use to important new findings about stages of child development and brain maturation which are clearly explained throughout It illustrates through dozens of concrete examples and guidelines how computers can be used successfully with children of different age groups as supplements to classroom curricula as research tools or in family projects Dr Healy issues strong warnings however against too early computer use recommending little or no exposure before age seven when the brain is primed to take on more abstract challenges She also lists resources for reliable reviews of child oriented software suggests questions parents should ask when their children are using computers in school and discusses when and how to manage computer use at home Finally she offers a thoughtful look at the question of which skills today s children will really need for success in a technological future and how they may best acquire them Based on years of research into learning and hundreds of hours of interviews and observations with school administrators teachers parents and students Failure to Connect is a

timely and eye opening examination of the central questions we must confront as technology increasingly influences the way we educate our children

**Protest - Analysing Current Trends** Matthew Johnson, Samid Suliman, 2016-03-22 The politics of the twenty first century is marked by dissent tumult and calls for radical change whether through food riots anti war protests anti government tirades anti blasphemy marches anti austerity demonstrations anti authoritarian movements and anti capitalist occupations Interestingly contemporary political protests are borne of both the Right and Left and are staged in both the Global North and South Globally different instances of protest have drawn attention to the deep fissures which challenge the idea of globalisation as a force for peace Given the diversity of these protests it is necessary to examine the particular nature of grievances the sort of change which is sought and the extent to which localised protest can have global implications The contributions in this book draw on the theoretical work of Hardt and Negri David Graeber and Judith Butler among others in order to explore the nature of hegemony the Occupy movement the Arab Spring the responses of authorities to protest and emotion and public performance in and representation of protest The book concludes with David Graeber's reply to reviews of his recent *The Democracy Project: A History, A Crisis, A Movement* This book was published as a special issue of *Global Discourse*
