Kenan Degirmenci, Thomas M Cerbe, Wolfgang E Pfau, 2022-04-28 The electrification of shared fleets offers numerous benefits including the reduction of local emissions of pollutants which leads to ecological improvements such as the improvement of air quality *Electric Vehicles in Shared Fleets* considers a holistic concept for a socio technical system with a focus on three core areas integrated mobility solutions business models for economic viability and information systems that support decision making for the successful implementation and operation of electric vehicles in shared fleets In this book we examine different aspects within these areas including multimodal mobility grid integration of electric vehicles shared autonomous electric vehicle services relocation strategies in shared fleets and the challenge of battery life of electric vehicles Insights into the future of transport are provided which is predicted to be shared autonomous and electric This will require the expansion of the charging infrastructure to provide adequate premises for the electrification of transportation and to create market demand *Globalization, Political Economy, Business and Society in Pandemic Times* Tony Fang, John Hassler, 2021-12-08

Globalization Political Economy Business and Society in Pandemic Times contributes to the growing literature on COVID 19 through a multidisciplinary approach by helping build a holistic understanding of the impact of the COVID 19 pandemic on politics economies business and society in a globalized world *The TESLA revolution* Willem Middelkoop, Rembrandt Koppelaar, 2017-04-05

We burnt our oil supplies up so fast that the era of cheap oil is over Finally there is a widespread recognition for the need to move to a post fossil fuel age Yet promises of too cheap to meter nuclear household power stations the hydrogen economy or abundant bio based fuels all remain dreams Is there still hope that humanity can bring about a renewable energy revolution Or will fossil fuels remain the driving force behind energy expansion and global politics The Tesla Revolution will help to understand the future direction of our energy systems In tracing rapid technological advances in batteries and solar technologies energy flows in economies geopolitical repercussions and the political decisions present and missing to bring an energy revolution ever closer A picture emerges of a transition that in our lifespans will reshape economies global power relations and even affect day to day lives and values *Business Innovation* Vijay

Pandiarajan, 2022-01-25 This book provides an understanding of innovation models and why they are important in the business context and considers sources of innovation and how to apply business frameworks using real world examples of innovation led businesses After providing a solid background to the key concepts related to innovation models the book looks at why innovation takes place and where the sources of innovation lie from corporate research to crowd sourced and government funded initiatives Innovation models across manufacturing services and government are explored as well as measuring innovation and the impact of design thinking and lean enterprise principles on innovation and sustainability driven imperatives Offering a truly comprehensive and global approach *Business Innovation* should be core or recommended

reading for advanced undergraduate postgraduate MBA and Executive Education students studying Innovation Management Strategic Management and Entrepreneurship *Impact of digital transformation on business models in the automotive industry* Robin Mayer, 2023-06-12 Master's Thesis from the year 2023 in the subject Engineering Automotive Engineering grade 1.5 University of Applied Sciences Aalen language English abstract Digital transformation and disruptive business models of new market players create unprecedented uncertainty in the automotive industry One of the main reasons is the lack of understanding for the need of adapting business models to a changing business environment due to new technologies and shifting customer wants and needs Even the automotive industry is not spared from digital Darwinism according to which it is not the strongest or most intelligent of a species that survives but rather the one that adapts best to change What opportunities do OEMs have to transform their business models How can best practices be used to generate new value creation and what influence does the transformation of the business model have on the ecosystem What role will the dealer play in the future and how can he still deliver added value to the OEM This paper provides an in depth insight into the world of automotive sales as well as a detailed analysis of the status quo Best practices based on successful business model transformations of the top tier OEMs are the basis for a deeper understanding and serve other companies as foundation for developing digital business models The goal of this paper is to examine the impact of digital transformation on the dealer business model and how they can continue to deliver value to the OEM For this purpose guided expert interviews are conducted with 16 experts from various areas of the automotive industry Subsequently a qualitative content analysis according to Mayring will be used to assess the challenges and impacts of the agent business model and to develop improvement measures and key topics that offer added value for OEMs The results of this thesis support dealers in understanding their future role in the automotive industry and show design recommendations for a future proof business model **Federal Register**, 2012-10 **Nexus Between Innovations, Environmental Challenges and Labor Mobility** Irfan Ullah, Ashfaq Ahmad Shah, Bilal, Rocky J. Dwyer, 2024-01-15 Theoretical arguments associate labor migration and regional innovation capacity are based on technological innovation and knowledge diffusion that stimulate productivity increase in firms institutions and regions Labor mobility may contribute efficiently in the knowledge spillover and diffusion and because migrants can utilize the knowledge and skill they gain from parental institutions which exploit in the host country The migrated skill worker increase the knowledge accumulation and spillover which leads to increase the productivity of firm institutions and region Human capital migration is essential for knowledge diffusion because it enables the transfer of tacit information between businesses or institutions enhancing productivity In this context of externalities generation skilled labor mobility is an important mechanism for the interregional transfer of technological knowledge diffusion **Lithium** Bednarski, Lukasz, 2021-09-15 A global energy revolution is unfolding before our eyes ever growing numbers of electric vehicles on our roads laptops that last all day on a single charge and solar panels on our roofs all reliant

on lithium ion batteries This revolution is happening at breath taking speed with the potential to completely transform key industries and the way we live For the first time in history we can now actually store this green energy we talk so much about Often referred to as the new oil lithium allows large amounts of energy to be squeezed into a very small space Demand is soaring and the lithium business is full of drama bitter rivalries shady deals and exceptionally talented visionaries such as Elon Musk who is building lithium battery giga factories across the world This book travels from the salt lakes of the Tibetan plateau where Chinese government linked companies extract lithium to Argentina Chile and Bolivia which hold the world s biggest resources of the mineral It reveals superpowers struggle to secure strategic supplies and the astonishing efforts of lone wolf inventors and entrepreneurs Lithium also explores the environmental impact of lithium extraction the limits to battery electrification and lithium battery recycling as the way forward **Time** Briton Hadden, Henry Robinson
