Implementation of an Android Framework for USB storage access without root rights Magnus Jahnen, 2016-07-22

Bachelor Thesis from the year 2014 in the subject Computer Science Software grade 1.0 Technical University of Munich language English abstract This bachelor thesis describes the implementation of an Android framework to access mass storage devices over the USB interface of a smartphone First the basics of USB i.e. interfaces endpoints and USB On the go and accessing USB devices via the official Android API are discussed Next the USB mass storage class is explained which was designed by the USB IF to access mobile mass storage like USB pen drives or external HDDs For communication with mass storage devices most important are the bulk only transfer and the SCSI transparent command set Furthermore file systems for accessing directories and files are described This thesis focuses on the FAT32 file system from Microsoft because it is the most commonly used file system on such devices After the theory part it is time to look at the implementation of the framework In this section the first concern is the purpose in general Then the architecture of the framework and the actual implementation are presented Important parts are discussed in detail The thesis finishes with an overview of the test results on various Android devices a short conclusion and an outlook to future developments Moreover the current status of the developed framework is visualized

Deep Learning with JAX Grigory Sapunov, 2024-12-03 Accelerate deep learning and other number intensive tasks with JAX Google's awesome high performance numerical computing library The JAX numerical computing library tackles the core performance challenges at the heart of deep learning and other scientific computing tasks By combining Google's Accelerated Linear Algebra platform XLA with a hyper optimized version of NumPy and a variety of other high performance features JAX delivers a huge performance boost in low level computations and transformations In Deep Learning with JAX you will learn how to Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax Leverage libraries and modules from the JAX ecosystem Deep Learning with JAX is a hands on guide to using JAX for deep learning and other mathematically intensive applications Google Developer Expert Grigory Sapunov steadily builds your understanding of JAX's concepts The engaging examples introduce the fundamental concepts on which JAX relies and then show you how to apply them to real world tasks You'll learn how to use JAX's ecosystem of high level libraries and modules and also how to combine TensorFlow and PyTorch with JAX for data loading and deployment About the technology Google's JAX offers a fresh vision for deep learning This powerful library gives you fine control over low level processes like gradient calculations delivering fast and efficient model training and inference especially on large datasets JAX has transformed how research scientists approach deep learning Now boasting a robust ecosystem of tools and libraries JAX makes evolutionary computations federated learning and other performance sensitive tasks approachable for all types of applications About the book Deep Learning with JAX teaches you to build effective neural networks with JAX In this example rich book you'll discover how JAX's unique features help you tackle important deep learning performance challenges like distributing

computations across a cluster of TPUs You'll put the library into action as you create an image classification tool an image filter application and other realistic projects The nicely annotated code listings demonstrate how JAX's functional programming mindset improves composability and parallelization What's inside Use JAX for numerical calculations Build differentiable models with JAX primitives Run distributed and parallelized computations with JAX Use high level neural network libraries such as Flax About the reader For intermediate Python programmers who are familiar with deep learning About the author Grigory Sapunov holds a Ph.D in artificial intelligence and is a Google Developer Expert in Machine Learning The technical editor on this book was Nicholas McGreivoy Table of Contents Part 1 1 When and why to use JAX 2 Your first program in JAX Part 2 3 Working with arrays 4 Calculating gradients 5 Compiling your code 6 Vectorizing your code 7 Parallelizing your computations 8 Using tensor sharding 9 Random numbers in JAX 10 Working with pytrees Part 3 11 Higher level neural network libraries 12 Other members of the JAX ecosystem A Installing JAX B Using Google Colab C Using Google Cloud TPUs D Experimental parallelization
