Protein Breakfast Vs Customer Service:

Customer Service for Hospitality and Tourism Simon Hudson, Louise Hudson, 2012-11-02 Customer service is of critical importance for the tourism and hospitality sector now more than ever before as customers are looking to increase value for money and are less forgiving of mediocre service. However, despite its importance, quality customer service is the exception rather than the norm in many parts of the world. *Customer Service for Hospitality and Tourism* is a unique text and vital to both students and practitioners as it explains not only the theory behind the importance of customer service but also acts as a guidebook for those wishing to put this theory into practice. In essence, it is the whys and hows of customer service. It is easy to read, very current, and full of references to all the latest research from both academic and practitioner literature. Chapters cover important topics such as the financial and behavioural consequences of customer service, consumer trends influencing service development, and maintaining a service culture. Managing service encounters, the importance of market research, building and maintaining customer relationships, providing customer service through the servicescape, the impact of technology on customer service, the importance of service recovery, and promoting customer service internally and externally. Key features include 'At Your Service' Spotlight at the beginning of each chapter, focusing on the achievements of successful individuals related to the art of customer service. Each chapter contains a Service Snapshot, short real-life cases to illustrate a particular concept or theoretical principle presented in the chapter. Detailed international Case Studies which cover a variety of sectors, organizations, and regions designed to foster critical thinking. The cases illustrate actual business scenarios that stress several concepts found in the chapter. They analyze customer service in the U.S., South America, South Africa, Europe, Russia, Australia, China, Canada, Korea, and Dubai.

Storytelling in Marketing and Brand Communications S M A Moin, 2024-07-12 Storytelling has redefined marketing from a brand monologue to brand consumer dialogues, conversations, and co-creation. Drawing on interdisciplinary narrative literature and the perspectives of legendary practitioners, this book reveals the art of storied brand communications and how storytelling affects our brains using consumer psychology and neuroscience insights. With theories, practice application, and several conceptual models, tools, and techniques, this book invites researchers, academics, marketing practitioners, and students to decode the art of storytelling and join the debate on how storytelling transforms the discourse of marketing and brand communications. Ancient people gathered around fires to bond and tell stories, passing wisdom from generation to generation. Likewise, we tell stories through social media platforms that transcend time and space. Moreover, digital storytelling in multiple forms and formats has transformed marketing, ushering in an era of a creative renaissance by infusing the imagination of human minds with the power of technology. In this context, the book positions brand storytelling as an artistic science evolving in the content creators' playground that fosters brand consumer conversation and co-creation. Although the future of storytelling is mysterious, the author argues that human minds will continue to dominate machines, creating marketing magic at the intersection of narrative art and technological science.

With a balance of theories and practice including conceptual models tools and techniques this book offers valuable insights allowing researchers academics as well as astute marketing practitioners and students to follow how the art of storytelling empowered by science and technology is transforming the discourse of brand communications in the imagination age
