Gove,2019-02-25 Access to books is key to learning to read and sustaining a love of reading Yet many low and middle income
countries struggle to provide their students with reading materials of sufficient quality and quantity Since 2008 RTI
International has provided technical assistance in early reading assessment and instruction to ministries of education in
dozens of low and middle income countries The central objective of many of these programs has been to improve learning
outcomes in particular reading for students in the early grades of primary school Under these programs RTI has partnered
with ministry staff to produce and distribute evidence based instructional materials at a regional or national scale in
quantities that increase the likelihood that children will have ample opportunities to practice reading skills and at a cost that
can be sustained in the long term by the education system In this paper we seek to capture the practices RTI has developed
and refined over the last decade particularly in response to the challenges inherent in contexts with high linguistic diversity
and low operational capacity for producing and distributing instructional materials These practices constitute our approach
to developing and producing instructional materials for early grade literacy We also touch upon effective planning for
printing and distribution procurement but we do not consider the printing and distribution processes in depth in this paper
We expect this volume will be useful for donors policymakers and practitioners interested in improving access to cost
