Qualitative Research Methods for Media Studies Bonnie S. Brennen, 2025-01-20. This fully updated fourth edition provides students and researchers with the tools they need to perform critically engaged, theoretically informed research using methods that include interviewing, focus groups, historical research, oral histories, textual analysis, ethnography, and participant observation, and digital ethnography and netnography. Each chapter features step-by-step instructions that integrate theory with practice, as well as a case study drawn from published research demonstrating best practices for media scholars. Readers will also find in-depth discussions of the challenges and ethical issues that may confront researchers using a qualitative approach. With new case studies and examples throughout, this fourth edition also includes updated and expanded material on performing data analysis, how to analyze and understand research findings, performing social media research, and the use of big data and Artificial Intelligence (AI). This includes a brand new chapter on generative AI, which examines recent advancements and technological developments and considers ways qualitative researchers can use it for their research. A comprehensive and accessible guide for those hoping to explore this rich vein of research methodology, this book provides students and scholars with all the tools they need to be able to work with in today's convergent media environment.

*The New Geography of Innovation: The global contest for breakthrough technologies* Mehran Gul, 2025-07-03. The US is the source of just about all the technologies that define modern life: personal computers, operating systems, smartphones, e-commerce, web browsers, email, search engines, social networks, electric cars, and the rest. And most of the tech companies that created and monetized these technologies are also in the US. **Generative AI Art** Oliver

Theobald, 2024-03-13. The course introduces the basic concepts of artificial intelligence and its application in art making, it is accessible even to those without a technical background. This foundation paves the way for exploring the nuances of effective prompt crafting, a critical skill for generating bespoke AI artwork. The course focuses on hands-on demonstrations with leading AI art software, including Craiyon and Midjourney, offering step-by-step guides to harness these tools effectively. Through practical examples, learners will understand how to navigate image prompts, masking techniques, framing, and lighting to enhance the visual appeal of their creations. The significance of navigating these elements is underscored by highlighting their role in achieving consistency and originality in AI-generated art. The course wraps up by delving into the remixing of popular art styles, the art of creating compelling text prompts, and the critical aspects of image rights, ethics, privacy, and originality in the digital art space. By concluding with recommended resources, learners are equipped to continue their journey in AI art, fueled by inspiration and a solid understanding of the field's possibilities and responsibilities.
