**Helping School Refusing Children and Their Parents** Christopher Kearney, 2008-03-19 Children who miss substantial amounts of school pose one of the most vexing problems for school officials In many cases school personnel must assess these students and successfully help them to return to the academic setting This can be difficult considering most school based professionals are pressed for time and do not have access to proper resources The information in this book can help school officials combat absenteeism and reduce overall dropout rates Designed for guidance counselors teachers principals and deans school psychologists school based social workers and other school professionals this book outlines various strategies for helping children get back to school with less distress that can easily be implemented in schools The book describes four clinical interventions that can be used to effectively address moderate cases of absenteeism as well as instructions for adapting these procedures for use within the school system A chapter on assessment describes several methods for identifying school refusal behavior including time limited techniques for school officials who have little opportunity to conduct detailed evaluations Worksheets for facilitating assessment are included and can easily be photocopied from the book Other chapters provide advice for working collaboratively with parents preventing relapse and tackling special issues such as children with anxiety children who take medication and children who are victims of bullying Topics such as poverty homelessness teenage pregnancy violence and school safety are also addressed

**Math for the Anxious** Rosanne Proga, 2004-01-21 Math for the Anxious Building Basic Skills is written to provide a practical approach to the problem of math anxiety By combining strategies for success with a pain free introduction to basic math content students will overcome their anxiety and find greater success in their math courses The first two chapters not only explain the sources of math anxiety they more importantly outline pragmatic steps students can take to reduce it In each of the following eight chapters strategies are implemented for learning a particular topic such as fractions that may have frustrated students in the past but can now be digested and mastered through hints patient explanations and revelations of how students already

encounter the topic on an everyday basis The final chapter brings all the strategies together and prepares students to encounter future math topics with newfound confidence and finely tuned techniques at their disposal *Resources in Education*, 1987 **EdPsych Modules** Cheryl Cisero Durwin, Marla Reese-Weber, 2020-01-07 EdPsych Modules uses an innovative modular approach and case studies based on real life classroom situations to address the challenge of effectively connecting theory and research to practice Succinct stand alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course The units begin with a set of case studies written for early childhood elementary middle and secondary classrooms providing students with direct insight into the dynamics influencing the future students they plan to teach All 25 modules highlight diversity emphasizing how psychological factors adapt and change based on external influences such as sex gender race language disability status and socioeconomic background The Fourth Edition includes over three hundred new references across all 25 modules and expanded coverage of diversity in new diversity related research This title is accompanied by a complete teaching and learning package
