The Handbook of Mental Health Communication Marco C. Yzer, Jason T. Siegel, 2025-03-31 The first book of its kind to offer a transdisciplinary exploration of mass communication approaches to mental health In the Handbook of Mental Health Communication a panel of leading scholars from multiple disciplines presents a comprehensive overview of theory and research at the intersection of mass communication and mental health With timely and authoritative coverage of the impact of message based mental health promotion this unique volume places mental health communication in the context of socio cultural causes of mental illness synthesizing public health psychopathology and mass communication scholarship into a single volume Throughout the Handbook nearly one hundred contributing authors emphasize that understanding communication effects on mental health outcomes begins with recognizing how people across the spectrum of mental illness process relevant information about their own mental health Fully integrated chapters collectively translate biased information attention interpretation and memory in mental health illness to real world implications of mental illness symptomatology and across the spectrum of mental health issues and disorders Providing a clear evidence based picture of what mental health promotion should look like The Handbook of Mental Health Communication is an invaluable resource for advanced undergraduate and graduate students scholars researchers lecturers and all health communication practitioners

Holistically healthy humans: championing mental and physical wellbeing in education Michelle Jayman, Anthea Rose, Jonathan Glazzard, Aimee Quickfall, 2025-12-03 Public health data shows that addressing the global mental health crisis is more challenging in the post pandemic environment The poorest children are four times more likely to experience difficulties than their wealthiest counterparts Crucially health does not operate at a singular level mental and physical health are inextricably linked Our physical body depends on our mental state and vice versa and improvement or decline in one area can trigger improvement or decline in the other For example many mental health difficulties and the associated stress they cause can disrupt sleep which is harmful to physical health over time Therefore it is vital to understand and engage with health and wellbeing from a holistic perspective Clearly a better understanding of the relationship between mind and body is imperative to help researchers practitioners and policymakers tackle co existing conditions support those experiencing difficulties and promote universal healthy behaviours to ameliorate the current crisis This Research Topic aims to explore the bi directional relationship between mental and physical health and ways of developing holistic wellbeing and healthy lifestyle practices The benefit of physical activity on the mental wellbeing of children and young people is strongly supported Numerous psychological effects including on self esteem cognitive function mood depression and quality of life have been shown and the body and brain are both extremely responsive to change Exercise can enhance mood and self esteem while decreasing stress levels Pertinently stronger effects were found when participation in physical activity occurred in a school based setting Conversely poor physical health significantly increases the risk of mental health difficulties often accompanied

with physical symptoms such as headaches and poor sleep This Research Topic will provide a wide reaching forum to present the latest research evidence on the essential components of wellbeing under one holistic lens Furthermore by adopting a health promotion and prevention framework it aims to offer pathways from research to practice for schools colleges and universities Specifically by providing practical solutions for adaptation and implementation at a local level Thus this Research Topic encourages the universal adoption of evidence based best practices and the championing of holistic wellbeing approaches across diverse education settings This Research Topic is broad in scope with its commitment to exploring wellbeing in education from a holistic lens and the parity of esteem between mental and physical health Mental and physical health themes and integrated approaches are equally relevant contributions Health topics include nutrition poor diet may be a causal factor in the experience of low mood and improving diet may help to protect not only physical health but mental health too With a key focus on prevention and promotion and support systems and interventions in educational settings articles featuring primary research on modifiable factors such as diet exercise and psychosocial interventions are welcomed Other pertinent topics may include integration of physical and mental health services support vulnerable groups and inequalities in health addressing access barriers and treatment gaps harnessing digital health technologies training across physical and mental health support in schools and other educational settings and integrating holistic wellbeing into daily life Policy and review manuscripts are also of interest
