Population, Society and Agricultural Planning Alain Marcoux, Food and Agriculture Organization of the United Nations, 1987-01-01 **Social and Economic Statistics for Africa** G.M.C. Kpedekpo, P.L. Arya, 2024-07-12 Originally published in 1981 this book deals with the general nature of social and economic statistics their sources collection use and reliability with an emphasis on Africa and source material available in Africa which deals with Africa The authors look in depth at specific topics such as population crime health housing labour social security agriculture external trade and national accounts Particular attention has been paid to the role played by Western concepts and definitions analysis and interpretation of African statistics and the problems to which these concepts give rise Explanation on how to interpret critically statistics collected by others and those which are published and used to guide decision making by governments and private organisations alike is given Undergraduate students taking courses in statistics and quantitative methods in Social Science Faculties through Africa will find this book useful as well as students of education agriculture and medicine in their introductory statistics courses The Hope of the Country with a Large Population Xueyuan Tian, 2014-01-24 China has the largest population in the world However according to the United Nations India and China are expected to simultaneously reach a population of approximately 1.38 billion by 2030 with India taking a slight lead China will be all too happy to surrender its position as the country with the largest population Where does this attitude come from For China this situation is symbolic of the solution to the excessive population and a milestone in the Three Stage population development strategy as well as the people's hope In order to realize this hope it firstly depends on the transformation from the previous high birth rate high death rate and low growth rate of population to a high birth rate low death rate and high growth rate and finally to a low birth rate low death rate and low growth rate It also relies on the post demographic transition to a low fertility level since the 1990s and secondly is closely related to the population change in the future Therefore in depth studies on population and the development of population resources environment economy and society should be conducted on the basis of fresh experiences and theories from the international community in order to move forward with the times to promote the solution to the population problem and realize the dream of rejuvenating the Chinese nation As a result population change is linked to this great rejuvenation as the great rejuvenation requires the population change and in turn the population change facilitates the great rejuvenation **Social Statistics and Social Reporting in and for Europe** Peter Flora, 1994 FAO Economic and Social Development Paper, 1987 *FAO Policies and Actions, Stockholm 1972-Rio 1992* Food and Agriculture Organization of the United Nations, 1992 Rural Extension, Education and Training Abstracts, 1982 **Research in Education**, 1968-07 **Monthly Catalog of United States Government Publications**, 1994 Monthly Catalogue, United States Public Documents, 1994 **HMSO Monthly Catalogue** Great Britain.
